One Week Workshop on “From No-Code to Code : Learn Web Development”

Dated: 08/09/2025 to 13/09/2025

Activity Report

Objective – The objective of this workshop was to introduce students to the transition from no-code development platforms to full-code web development using modern frameworks. The workshop aimed to develop practical skills in designing and building dynamic, responsive, and scalable web applications. It also focused on strengthening students understanding of component-based development, API integration, state management, and deployment to meet current industry standards.

Description- The One Week Workshop titled “From No-Code to Code: Learn Web Development” was organized by the Department of Information Technology, KDK College of Engineering, Nagpur, from 08 September 2025 to 13 September 2025. The workshop was conducted under the expert guidance, a seasoned professional with extensive experience in web and application development.

The workshop was designed to provide a structured transition from no-code development concepts to full-fledged coding practices using modern web technologies. Participants were introduced to the fundamentals of web development, followed by in-depth training on the React.js framework, which is widely used for building dynamic and scalable web applications. The sessions covered essential topics such as component-based architecture, JSX, props and state, routing, hooks, API integration, and real-time data handling.

Special emphasis was placed on developing responsive and user-centric web applications that align with current industry requirements. The workshop included live coding demonstrations, hands-on practical sessions, and interactive discussions that encouraged active participation and collaborative learning. Students worked on mini-projects and real-time use cases, enabling them to apply theoretical concepts to practical scenarios.

Outcome

At the end of this event students will be able to:

1. Understand the Fundamentals of Web Development:

Gained a clear understanding of core web concepts including HTML, CSS, and JavaScript, forming a strong foundation for building modern websites.

2. Transition from No-Code to Code-Based Development:

Learned how to move beyond drag-and-drop website builders and start creating web pages through actual coding practices.

3. Build Basic to Intermediate Web Pages:

Developed the ability to design and structure responsive, functional, and visually appealing web pages using standard web technologies.

4. Develop Confidence to Start Independent Projects:

Acquired the necessary skills and confidence to create simple web projects independently and explore further learning pathways in frontend development.

Notice

Date: 05/09/2025

All the students are informed that the Department of Information Technology is organizing a **One Week Workshop on “From No-Code to Code : Learn Web Development”** by **Er. Shubham Dhapodkar** , **Mastcore Digital Services, Nagpur** from **08/09/2025** to **13/09/2025**, for Second Year Students.

Venue: B-212

Time: 10:45 AM to 5:00 PM.

All the students are requested to attend the program.

One Week Workshop Activity Report (Session: 2025-2026)

Category of the Activity:	One Week Workshop
Title of the Activity	"From No-Code to Code : Learn Web Development"
Date of Activity	08/09/2025 to 13/09/2025
No. of Students Involved:	Male: 30 Female: 35 Total: 65
Details of Invited Speaker	Er. Shubham Dhapodkar , Mastcore Digital Services, Nagpur

Brief about an Activity	The Department of Information Technology organized a One-Week Workshop on "From No-Code to Code: Learn Web Development" with the objective of introducing students to the fundamentals of web development, starting from no-code platforms and progressing towards hands-on coding. The workshop enabled participants to understand website creation using no-code tools as well as core web technologies such as HTML, CSS, and JavaScript. The sessions emphasized practical demonstrations, hands-on practice, and real-world applications of web development.
Objectives	• To introduce students to the basics of web development using no-code platforms • To bridge the gap between no-code tools and traditional coding approaches • To provide hands-on experience with HTML, CSS, and JavaScript • To develop logical thinking and problem-solving skills in web development
Outcomes	• Students gained foundational knowledge of web development • Participants learned to create websites using tools and coding techniques • Students developed basic responsive web pages using HTML, CSS, and JavaScript • The workshop enhanced confidence in designing and developing websites

Report

The Department of Information Technology successfully organized a One-Week Workshop on “**From No-Code to Code: Learn Web Development**” with the objective of introducing students to the fundamentals of web development by gradually transitioning from no-code platforms to hands-on coding. Workshop aimed to build a strong foundation in web technologies while making learning accessible to beginners.

The workshop was conducted over a period of one week and focused on enabling students to understand how websites are designed, developed, and deployed. The initial sessions introduced participants to no-code tools, allowing them to create basic websites without prior programming knowledge. This approach helped students grasp the structure and workflow of web development in a simple and intuitive manner.

The workshop also highlighted real-world applications of web development and explained how modern websites evolve from simple designs to fully functional applications. Students were encouraged to experiment, ask questions, and apply their learning through practice sessions. The interactive nature of the workshop helped in enhancing problem-solving abilities and logical thinking.

By the end of the workshop, participants were able to design and develop basic responsive websites using both no-code tools and traditional coding techniques. The workshop significantly improved students’ confidence in web development and motivated them to explore advanced technologies in the field. Overall, the event was highly beneficial and well-received, contributing to the technical skill development of the students.
