CONCRETE MIX DESIGN WORKSHOP (CMD-24)

DATE- 26-08-2024 TO 31-08-2024

ACTIVITY REPORT

Aim & Objectives

Aim

The aim of conducting one week workshop of concrete mix design is to educate and enlighten the students about the

1. To help students to understand the concrete mix design.
2. Knowledge about the non-destructive testing equipment.

Objectives

- 1) To achieve the designed/ desired workability in the plastic stage.
- 2) To achieve the desired minimum strength in the hardened stage.
- 3) To achieve the desired durability in the given environment conditions.
- 4) To produce concrete as economically as possible.

Overall, the aim and objectives of the concrete mix design is to equip students with the necessary knowledge, insights, and resources to navigate the complex landscape of concrete as it is the second most material used after water.

All to overcome the gap between the syllabus and actual practise on site for their carrier growth and success in jobs.

Good

no

Adding some creative models which help to understand the concept

It was an excellent workshop. I gain more information. Also got chance to interact with engineers.

Inspiration

Nope

Take more workshop like this workshop it's very informative

Workshop is really helpful for us.

.

It was very great session 👍

Impact Analysis

Impact Analysis is a technique designed to unearth the "unexpected" negative effects of a change on an organization. It provides a structured approach for looking at a proposed change, so that you can identify as many of the negative impacts or consequences of the change as possible.

From the Post and Pre feedback it is observed that there is a vast improvement in the knowledge of the students as earlier they don't have the exposure to concrete mix design but after the workshop, they are able to give answer with overall score of above 60%.

From the above workshop the student gets benefited and all Program Outcomes are attained.
