Syllabus related to Professional Ethics, Gender, Human Values, Environment and Sustainability into the Curriculum

1. Indian Knowledge System

KDK College of Engineering, Nagpur

Faculty of Science and Technology

B.Tech. Civil /Mechanical/Electrical/ETC/CSE/IT/AIDS Engineering

Semester I	Subject Code: 1BIK01T-A	Name of Subject: Indian Knowledge System		
Total Hours Distribution per week				
Total Credit: 2	Lecture (L): 2 Hrs	Tutorial(T) :-	Practical(P): -	
Examination Scheme				
Mid Sem Examination	Continual Assessment	End Sem Examination	Total Marks	Examination Duration:
15 Marks	10 Marks	25 Marks	50 Marks	2 Hours

Course Description:

Indian Knowledge System (IKS) is a multidisciplinary field encompassing various aspects of traditional Indian knowledge, including philosophy, science, technology, arts, and humanities. This course aims to provide students with a deep understanding of India's rich intellectual heritage and its relevance in contemporary times.

Course Objectives

1	To introduce students to the diverse dimensions of Indian knowledge traditions.
2	To analyze the contributions of ancient Indian scholars to different fields of knowledge.
3	To explore the interconnectedness of various branches of Indian knowledge.
4	To critically evaluate the relevance of Indian knowledge systems in modern society.

Course Outcomes

After completion of syllabus, the student is able to -

1	Understand the diverse dimensions of Indian knowledge traditions.
2	Analyze the contributions of ancient Indian scholars to different fields of knowledge.
3	Explore the interconnectedness of various branches of Indian knowledge.
4	Critically evaluate the relevance of Indian knowledge systems in modern society.

SYLLABUS

Details of Topic	Hours	Mapped with CO
Unit 1: Introduction to Indian Knowledge Systems & Philosophical Foundations	6	CO1
Definition and scope of Indian Knowledge System, Historical evolution and significance		
Philosophical Foundations- Schools of Indian philosophy (Nyaya, Vaisheshika, Samkhya, Yoga, Vedanta, etc.), Concept of Dharma and its implications, Ethics and morality in Indian thought		
Unit 2: Scientific Heritage , Arts and Aesthetics	6	CO2
Scientific Heritage : Contributions of ancient Indian scientists (Aryabhata, Varahamihira, etc.) , Mathematics and astronomy in ancient India, Ayurveda and traditional Indian medicine		
Arts and Aesthetics : Indian classical arts (music, dance, theatre, painting, sculpture) ,Aesthetics in Indian literature and poetry, Architecture and temple construction		
Unit 3: Social Sciences and Governance	6	CO3
Social Sciences and Governance : Traditional Indian polity and governance systems ,Economic principles in ancient India (Arthashastra, trade, agriculture) ,Social organization and caste system		
Linguistic and Literary Heritage : Development of Sanskrit as a language of knowledge , Indian literary traditions (epics, Puranas, literature in regional languages) ,Contribution of Indian grammarians (Panini, Patanjali)		
Unit 4: Environmental Wisdom & Contemporary Relevance	6	CO4
Environmental Wisdom : Ecological insights in ancient Indian texts ,Traditional ecological practices and sustainability , Indigenous knowledge systems related to environment and biodiversity		
Contemporary Relevance : Revival and preservation of Indian knowledge systems , Integration of traditional knowledge with modern sciences , Challenges and opportunities in promoting IKS in the 21st century		

Text Books

2. Consciences Study

KDK College of Engineering, Nagpur
Faculty of Science and Technology
B.Tech. Civil /Mechanical/Electrical/ETC/CSE/IT/AIDS Engineering

Semester: I	Subject Code: IBIK01T-B	Name of Subject: Consciousness Studies		
Total Hours Distribution per week				
Total Credit: 2	Lecture (L): 2 Hrs.	Tutorial (T) : --	Practical (P): --	
Examination Scheme				
Mid Sem Examination	Continual Assessment	End Sem Examination	Total Marks	Examination Duration:
15 Marks	10 Marks	25 Marks	50 Marks	2 Hours

Course Objectives	
1	To create the awareness about the importance of consciousness among the students
2	To introduce students to Psychological Perspectives and neurological aspects of consciousness
3	To brief students about the various methods of studying the levels of consciousness
4	To enable to understand the importance and implications of consciousness for personal well-being and societal transformation

Course Outcomes	
After completion of syllabus, the student is able to	
1	Understand and analyze the basics of Consciousness
2	Develop detailed knowledge about the Psychological Perspectives and neurological aspects of consciousness
3	Apply the various methods for studying the Consciousness level
4	Interrelate the role of consciousness in the society for better living

KDK College of Engineering, Nagpur

SYLLABUS

Details of Topic	Hours	Mapped with CO
Unit 1: INTRODUCTION TO CONSCIOUSNESS	7	CO1
Defining consciousness, Historical perspectives on consciousness		
The mystery of consciousness		
Philosophical Approaches to Consciousness: Dualism vs. materialism, Idealism and panpsychism		
Theories of mind and consciousness (e.g., identity theory, functionalism)		
Unit 2: PSYCHOLOGY & NEUROSCIENCE OF CONSCIOUSNESS	7	CO2
Stream of consciousness, Levels of consciousness (e.g., conscious, unconscious, subconscious),		
The role of attention in consciousness, Neural correlates of consciousness		
The global workspace theory, Disorders of consciousness (e.g., coma, locked-in syndrome)		
Unit 3: STUDY OF CONSCIOUSNESS	6	CO3
Methods of Studying Consciousness: Introspection and self-report methods, Behavioural experiments (e.g., priming, blindsight),		
Neuroimaging techniques (e.g., fMRI, EEG)		
Unit 4: SOCIETAL CONSCIOUSNESS	4	CO4
Consciousness and ethics, Consciousness and artificial intelligence		
Implications of consciousness for personal well-being and societal transformation		

Text Books

3. Preserving Art, Culture and Tradition

KDK College of Engineering, Nagpur

Faculty of Science and Technology

B.Tech. Civil /Mechanical/Electrical/ETC/CSE/IT/AI & DS Engineering

Semester I	Subject Code: 1BIK01T-C	Name of Subject: Preserving Art, Culture, and Tradition		
Total Hours Distribution per week				
Total Credit: 2	Lecture (L): 2 Hrs	Tutorial (T) : -	Practical (P): -	
Examination Scheme				
Mid Sem Examination	Continual Assessment	End Sem Examination	Total Marks	Examination Duration:
15 Marks	10 Marks	25 Marks	50 Marks	2 Hours

Course Description:

This course explores the importance of preserving and promoting art, culture, and tradition in contemporary society. Students will examine various methods, strategies, and challenges associated with preserving cultural heritage and traditions, with a focus on interdisciplinary approaches.

Course Objectives	
1	To understand the significance of preserving art, culture, and tradition.
2	To explore the relationship between art, culture, tradition, and identity.
3	To analyze different methods and approaches to preserve cultural heritage.
4	To examine the role of technology in preserving and promoting cultural heritage.

Course Outcomes	
After completion of syllabus, the student is able to -	
1	Understand the significance of preserving art, culture, and tradition.
2	Explore the relationship between art, culture, tradition, and identity & analyze different methods and approaches to preserve cultural heritage.
3	Explore <i>Policies, Challenges & Threats</i> for cultural & heritage preservation.
4	Examine the role of technology in preserving and promoting cultural heritage.

4. Wellness, Traditional Medicines & Yoga

KDK College of Engineering, Nagpur

Faculty of Science and Technology

B.Tech. Civil /Mechanical/Electrical/ETC/CSE/IT/AIDS Engineering

Semester 1	Subject Code: 1BIK01T-D	Name of Subject: Wellness, Traditional Medicines, and Yoga		
Total Hours Distribution per week				
Total Credit: 2	Lecture (L): 2 Hrs	Tutorial (T) : -	Practical (P): -	
Examination Scheme				
Mid Sem Examination	Continuous Assessment	End Sem Examination	Total Marks	Examination Duration:
15 Marks	10 Marks	25 Marks	50 Marks	2 Hours

Course Objectives	
1	The course will enable engineering students to acquire the knowledge of richness of healthy lifestyle and strong heritage of yoga and Vedas in Indian traditional system..
2	This course provides an introduction to the principles and practices of wellness, traditional medicines, and yoga.
3	To explore the holistic approach to health and well-being through the integration of physical, mental, and spiritual dimensions.

Course Outcomes	
After completion of syllabus, the student is able to	
1	To understand the concept of wellness and its importance in modern life.
2	To explore the principles and practices of traditional medicines from different cultures
3	To learn various yoga techniques and their benefits for physical and mental health and to analyze the scientific basis and evidence supporting traditional medicines and yoga.
4	To develop practical skills for incorporating wellness practices into daily life.

SYLLABUS

Details of Topic	Hours	Mapped with CO
Unit 1: Introduction to Wellness	6	CO1
Definition of wellness		
Dimensions of wellness (physical, mental, emotional, social, spiritual)		
Importance of wellness in modern life		
Assessing personal wellness		
Unit 2: Traditional Medicines	6	CO2
Overview of traditional medicine systems (Ayurveda, Chinese Medicine, Unani, etc.)		
Principles of traditional medicines		
Herbal remedies and their uses		
Case studies and examples of traditional medicine practices		
Unit 3: Yoga Asanas (Postures) and Pranayama	6	CO3
Introduction to yoga asanas and pranayama		
Importance and benefits of yoga, Purpose of yoga, traditional knowledge of medicinal plant, use of home available herbs and spices.		
Basic yoga asanas and their benefits		
Alignment and safety in asana practice		
Modifications for different body types and abilities.		
Mindfulness practices for stress reduction and relaxation		
Unit 4: Integrating Wellness Practices	6	CO4
Holistic approach to wellness		
Creating a personal wellness plan		
Integrating traditional medicines and yoga into daily life		
Resources and support for ongoing wellness practice

15 Marks	10 Marks	25 Marks	50 Marks	2 Hours

Course Objectives

1	This course provides an overview of the foundational texts that have shaped Indian civilization
2	It explores the literary, cultural, and philosophical dimensions of these works.
3	To develop an aptitude for critically reading a variety of Indian literatures
4	To enhance creative skills and creative expression

Course Outcomes

After completion of syllabus, the student is able to

1	To introduce students to the major literary texts of ancient and classical India.
2	To explore the historical and cultural contexts in which these texts were produced.
3	To analyze the themes, characters, and narrative techniques employed in Indian literary classics.
4	To examine the influence of these texts on Indian society and culture and To encourage critical thinking and interpretation of Indian literary heritage

SYLLABUS

Details of Topic	Hours	Mapped with CO
Unit 1: Introduction to Indian Civilization and Vedic Literature	6	CO1
Overview of Indian history and culture		
Introduction to Indian literary traditions		
Significance of literature in Indian society		
Introduction to scales & scale factor (RF)		
Free hand sketches of basic building elements		
Rigveda: Selections and analysis-		
Samaveda, Yajurveda, Atharvaveda: Overview		
Upanishads: Philosophical insights and spiritual concepts		
Unit 2: Epics and Puranas		
Ramayana: Valmiki Ramayana and its themes		
Mahabharata: Vyasa's epic and its characters		
Puranas: Myths, legends, and religious narratives

Unit 2: Practical- Basic Fitness Warm-Up and Cool Down - General & Specific Exercises, Physical Fitness Activities, Stretching Exercises, General & Specific Exercises for Strength, Speed, Agility, Flexibility, coordinative abilities
Unit 3: Practical- Exercises for Wellness Cardiovascular Exercises, Assessment of BMI, Relaxation techniques, Physical Efficiency Tests
Unit 4: Yoga-Basic Asanas, Pranayama & Surya Namaskara Shukshma Vyayam, Suryanamaskar, Basic Set of Yogasanas – Sitting, standing, supine and prone position, Basic Set of Pranayama & Meditation, Vibhagiya Pranayama (Sectional breathing), Sukha Pranayama (Breath awareness), Kapalabhathi/Basthrika& Anuloma Viloma/Nadi Shuddhi, Bhramari & Cooling Pranayamas (Sithali/Sithkari/Sadantha)

LIST OF PRACTICAL:

Pr. No.	List of Practical
1	Study and performance of Warm-Up and Cool Down Exercises
2	Study and performance of Stretching Exercises
3	Study and performance of CardiovascularExercises
4	Study and performance of ShukshmaVyayam , Suryanamaskar
5	Study and performance of Yogasanas – Sitting, standing, supine and prone position
6	Study and performance of Pranayama & Meditation
7	Study and performance of Kapalabhathi/Basthrika& Anuloma Viloma/Nadi Shuddhi
8	Study and performance of Bhramari & Cooling Pranayamas (Sithali/Sithkari/Sadantha)

7. Introduction to Foreign Languages and Culture – Japanese / Spanish / German

KDK College of Engineering, Nagpur
Faculty of Science and Technology
B.Tech. Civil /Mechanical/Electrical/ETC/CS/IT/AI&DS Engineering

Semester I/II	Subject 1BCC05P/ 2BCC05P	Code:	Name of Subject: Introduction to Foreign Languages and Culture- Japanese /Spanish /German
Total Hours Distribution per week			
Total Credit: 2	Lecture (L): --	Tutorial (T): --	Practical (P): 4 Hrs.
Examination Scheme			
Continuous Assessment	End Sem Examination	Total Marks	Examination Duration:
100 Marks	-	100 Marks	-

Practical Course Objectives	
1	To develop basic communication skills in Japanese Language and help develop a basic understanding of Japanese culture in cross-cultural communication.
2	To help build a foundation and interest in Spanish language so that the students can pursue the proficiency levels of the language in higher semesters
3	To prepare students for elementary communication skills, based on oral and written comprehension of common words and simple sentences in German.
4	Meet the needs of growing industry with respect to language support.

Course Outcomes	
After completion of syllabus, the student is able to	
1	Develop ability to use vocabulary required for everyday conversations of basic level communication in Japanese language.
2	Demonstrate basic knowledge about Spain language and develop ability to use simple language structures in everyday communication, write in basic Spanish about themselves and others.
3	Use basic knowledge about German language to develop ability of reading and writing German conversations related to simple day-to-day situations.
4	Identify Japanese culture, Spanish culture and German culture to meet the needs of growing industry.

SYLLABUS

Details of Topic with List of Practicals
Unit 1: Communication skills in Japanese language: Introduction to the structure of Japanese language, Basic vocabulary for daily use, Introduction to Hiragana script, Words based on Hiragana
Practicals: 1. Self-introduction in Japanese language 2. Reading and writing of Hiragana characters. 3. Study of Numbers (1-10000), Days of the week, dates, months, year, and Clock time. 4. Practice of Daily Greetings in Japanese language

KDK College of Engineering, Nagpur

(Accredited by NAAC & NBA)

Approved by AICTE, Recognized by UGC under Section 2(f) of the UGC Act, 1956

Affiliated to Rashtrasant Tukadoji Maharaj Nagpur University

Unit 2: Vocabulary building in Spanish language: Orientation about Spain, Basic Introduction of Spanish language, Communication Skills and Writing Skills in Spanish language.

- Practicals:** 1. Practice sessions of Vocabulary building for every day conversations.
2. Reading and writing simple text in Spanish language.
3. Listening comprehension and summarize it in Spanish language.

Unit 3: Introduction, Vocabulary and Grammar of German language:

German alphabets and Character set, Introduction to Germany, Grammar- Nouns- genders, article, Plural; Vocabulary- Months, weekdays and daytimes and Seasons; Vocabulary- The number system.

- Practicals:** 1. Study Grammar and practice of Vocabulary building for every day conversations.
2. Reading and writing simple text in German language.
3. Practice sessions of basic greetings, Self-Introduction in German language.

Unit 4: Civilization in Japan, Spain and Germany:

Basic introduction about Japan, Spain and Germany; and their history, geography, culture and traditions; their relations with India and co-operation in various fields. Elementary familiarity with cultural information such as important events and days, monuments, festivals.

- Practicals:** 1. Study of Vocabulary - House and Furniture and Draperies in Japanese, Spanish and German language. Practice sessions.
2. Study Vocabulary for -Family, profession, food, Drink and Cutlery in Japanese, Spanish and German language. Practice sessions.

8. Basics of Vedic Maths

KDK College of Engineering, Nagpur
Faculty of Science and Technology
B.Tech. Civil /Mechanical/Electrical/ETC/CS/IT/AI & DS Engineering

Semester I/II	Subject Code: 1BCC06P/2BCC06P	Name of Subject: Basics of Vedic Math	
Total Hours Distribution per week			
Total Credit: 2	Lecture (L): -	Tutorial (T) : -	Practical (P): 4Hrs
Examination Scheme			

Continuous Assessment	End Sem Examination	Total Marks	Examination Duration:
100 Marks		100 Marks	

Practical Course Objectives	
1	To empower learners to discover the efficacy and potential of Vedic Mathematics.
2	To strengthen learners proficiency in numerical mathematics.
3	To enable learners to recognize and understand simple techniques of Arithmetical calculations.
4	To train learners to use the ideas of Vedic math in daily calculations and make those calculations with accuracy and speed.

Practical Course Outcomes	
After completing the practical course, students will be able to	
1	Compute simple arithmetic calculations with speed and accuracy.
2	Generate tables of any number
3	Solve products of large numbers quickly
4	Solve difficult calculations like square roots and cube roots of integers speedily.

SYLLABUS

Details of Topic and List of Practicals
Unit 1: Vedic math - High Speed Addition and Subtraction- Vedic Math: History of Vedic math and its Features, Vedic Math formulae: Sutras and Upsutras, Addition in Vedic Math: Without carrying, Dot Method, Subtraction in Vedic Math: Nikhilam Navatashcaramam Dashatah (All from 9 last from 10), Fraction -Addition and Subtraction
Unit 2: Vedic Math - Miracle Multiplication and Excellent Division- Multiplication in Vedic Math: Base Method (any two numbers upto three digits), Multiplication by Urdhva Tiryak Sutra, Miracle multiplication: Any three-digit number by series of 1's and 9's, Division by Urdhva Tiryak Sutra (Vinculum method)
Unit 3: Vedic Math - Squares and Rapid Cubes- Squares of any two-digit numbers: Base method, Square of numbers ending in 5: Ekadhikena Purvena Sutra, Easy square roots: Dwandwa Yoga (duplex) Sutra, Square root of 2: Baudhayana Shulbasutra, Cubing: Yavadunam Sutra

Unit 4: Algebra and Geometry-

Factoring Quadratic equation: Anurupyena, Adyamadyenantyamanty Sutra, Concept of Baudhayana (Pythagoras) Theorem, Circling a square: Baudhayana Shulbasutra, Concept of pi: Baudhayana Shulbasutra

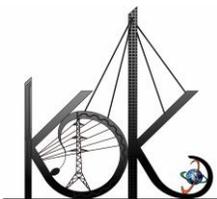

LIST OF PRACTICAL:

Prac. No.	List of Practical
1	Numerical of Addition using Vedic Math (At least 6 numerical)
2	Numerical of Subtraction using Vedic Math (At least 6 numerical)
3	Numerical of Multiplication using Vedic Math (At least 6 numerical)
4	Numerical of Division using Vedic Math (At least 6 numerical)
5	To find Square roots using Vedic Math (At least 6 numerical)
6	To find Cubes, Cube roots using Vedic Math (At least 6 numerical)
7	To Solve Quadratic Equations using Vedic Math (At least 6 numerical)
8	To study the Concept of Baudhayana (Pythagoras) Theorem, Circling a square: Baudhayana Shulbasutra, Concept of pi: Baudhayana Shulbasutra
9	Activities/ Pictorial display based on above syllabus

9. Music

KDK College of Engineering, Nagpur
Faculty of Science and Technology
B.Tech.

Civil /Mechanical/Electrical/ETC/CS/IT/AI&DS Engineering

Semester I/II	Subject Code: 1BCC01P-C / 2BCC01P-C	Name of Subject: Music		
Total Hours Distribution per week				
Total Credit: 2	Lecture (L):	Tutorial (T) : -	Practical (P): 4 Hrs	
Examination Scheme				
Mid Sem Examination	Continuous Assessment	End Sem Examination	Total Marks	Examination Duration:
--	100 Marks	--	100 Marks	2 Hours

Practical Course Objectives	
1	To enhance the music skills of the students.
2	To enhance the musical instruments' skills of the students.
3	To prepare students to overcome the futuristic challenges in the field of Music.

Course Outcomes	
After completion of syllabus, the student is able to	
1	Identify various Raags of music and differentiate between the classical music and the light music.
2	Operate various instruments of music.
3	Differentiate between the various musical instruments
4	Use music in therapy.

SYLLABUS

Details of Topic with List of Practicals
<p>Unit 1: Basic Knowledge of Music: Fundamentals of music, a system to interpret musical compositions, basic music theory containing the elements that form harmony, melody, and rhythm.</p> <p>Practicals: 1. Study of Sam Veda. 2. Study difference between Classical Music and Light Music. 3. Study of various Technical – Terminology: Raga, Tala, Gamak, Gandharva – Gaan, Giti, Gaan, Varna, Alankar, Melody, Harmony, Musical Scales 4. Vocal recital of various ragas like Yaman, Bhupali.</p>
<p>Unit 2: Importance of Tabla and Pakhawaj: Origin, History, Development of Tabla and Pakhawaj, Importance of Tabla in Films, Advertisers etc Importance of Pakhawaj in Film, Music</p>

“Service to the Society through Quality Technical Education”

10. Chess

KDK College of Engineering, Nagpur
Faculty of Science and Technology
B.Tech.

Civil /Mechanical/Electrical/ETC/CS/IT/AI&DS Engineering

Semester I/II	Subject Code: 1BCC01P-D / 2BCC01P-D	Name of Subject: Chess	
Total Hours Distribution per week			
Total Credit: 2	Lecture (L): --	Tutorial (T) :-	Practical (P): 4Hrs
Examination Scheme			
Continuous Assessment	End Sem Examination	Total Marks	Examination Duration:
100 Marks	-	100 Marks	-

Course Objectives

1	To grows dendrites which conduct brain signals and the prefrontal cortex, which coordinates planning, judgement and self-control
2	To develop creativity by activating the right side of the brain.

Course Outcomes

Upon successful completion of the course the students will be able to	
1	Develop problem solving skills and memory improvement.
2	Work under tense situations and pressure.

SYLLABUS

Details of Topic with List of Practicals

Unit 1: Basic Knowledge
Overview, Chess Board and piece, Movement of pieces and their values, attack, capture, check, notations.
Practicals: 1. Study of Chess Board and no. of pieces. 2. Study of movement of pieces and their values. 3. Study of their attack, capture, check, and notations of pieces. 4. Practice session of playing Chess.
Unit:2 Special Move

Civil/Mechanical/E.E/CSE/IT/AIDS/ETC Engineering

Semester: I/II	Subject Code: 1BCC01P-H / 2BCC01P-H	Name of Subject: Basket Ball	
Total Hours Distribution per week			
Total Credit: 2	Lecture (L):	Tutorial (T) : --	Practical (P): 4 Hrs.
Examination Scheme			
Continuous Assessment	End Sem Examination	Total Marks	Examination Duration:
100 Marks	-	100 Marks	-

Course Objectives

1	To support for growing dendrites which conduct brain signals cortex, which coordinates planning, judgment and self-control.
2	To develop creativity by activating the right side of your brain.
3	To develop effective Listening Skill.
4	To arrange practice and improve students' oral communication skills.

Course Outcomes

After completion of syllabus, the students will be able to	
1	Demonstrate basic basketball rules, terminology, and safety concerns
2	Demonstrate the ability to perform individual offensive and defensive skills and strategies.
3	Demonstrate the ability to perform team offensive and defensive skills and strategies.
4	Demonstrate an understanding of health-related fitness components: muscular strength, muscular endurance, and stress management

KDK College of Engineering, Nagpur

(Accredited by NAAC & NBA)

Approved by AICTE, Recognized by UGC under Section 2(f) of the UGC Act, 1956

SYLLABUS

Details of Topic & list of Practicals

Unit 1: Basic Knowledge

Dimension and Measurement of basketball court, Circumference and sizes of ball, Duration and time outs quarter wise. Fouls:- Personal, Technical, Intentional and Disqualification, Discussion about the various age groups. Rules of Under 13 age group, Various signs of referees, Knowledge of score sheet. Time Keeper, Short Clock operator, Knowledge of team fouls and personal foul plates.

Practicals: 1. Study of Dimension and Measurement of basketball court, Circumference and sizes of ball, Duration and time outs quarter and practice it.
2. Study of various types of foul.

Unit 2: Level 1

Stance (Dribble, Pass, Receive and Shooting), How to hold a ball, Dribbling (Low, Medium, High), Pass and Receive (Chest, Bounce, Overhead and Side), Running Dribble, One step and pass, Zig Zag running dribble with cone, Dribble out fun game to improve dribble, Look up and dribble, Tap the Cone and dribble, Shadow drill

Practicals: 1. Study of Stance and Dribbling (Low, Medium, High).
2. Study of Dribble out fun game and Shadow drill.

Unit 3: Level 2

Cross Dribble (Full court), Two man pass, Three man pass without cutting and Running step for Layup with cone, Zig Zag running dribble both hands, Lay up from 45 positions, Shooting with one hand, Stance (Shooting, Defence), Toss the cone while dribbling, Three man pass with Cutting.

Practicals: 1. Study of Cross Dribble (Full court) and Zig Zag running dribble both hands.
2. Study of Shooting with one hand, Toss the cone while dribbling and practice it.

Unit 4: Level 3

Man-to-man Defence offence, 1 on 1, 2 on 2, 3 on 3. Screen and roll One dribble and Layup. Introduction of Zone defence (3-2, 2-1-2), Zone Shifting, Rotation, lay up from both side both hand

Practicals: 1. Study of Man to man Defence offence and practice it.
2. Study of Zone Shifting, Rotation, lay up from both side both hand & practice it.

Total Hours Distribution per week			
Total Credit: 2	Lecture (L): --	Tutorial (T): --	Practical (P): 4 Hrs.
Examination Scheme			
Continuous Assessment	End Sem Examination	Total Marks	Examination Duration:
100 Marks	-	100 Marks	-

Course Objectives

1	To enhance the Physical fitness and skills.
2	To integrate aspects of physical and mental health.
3	To develop the concept of "team" and healthy interaction with teammates.

Course Outcomes

After completion of syllabus, the student is able to	
1	Demonstrate attitudes, behaviors, and practices that support personal well-being and life-long learning.
2	Apply discipline and commitment developed in practice and competition to academic achievement.
3	Demonstrate traits of good sportsmanship and teamwork in both competition and practice.
4	Demonstrate an expert knowledge of the strategies and skills of the athletics and use critical thinking skills to apply this knowledge in competitive situations.

SYLLABUS

Details of Topic with List of Practicals

Unit 1: Historical survey of athletics- History of Athletics in India & Olympics, Training and Coaching of Athletes Selection of an Athlete, Organization and Administration of Athletic Meet. Track and Field Marking with Layout of Field Events
Practical: 1. Relay Race, Stretching 2. Technique of Long Jump & High Jump
Unit 2: Rules and hygiene of atheletics- Rules and Regulations of Track and Field Events, Duties and Powers of Officials.
Practical: 1. Fartleok Training, ExelARATION Running, Throwing, Jumping, Stretching

“Service to the Society through Quality Technical Education”

13. Painting

KDK College of Engineering, Nagpur
Faculty of Science and Technology
B.Tech.

Civil / Mechanical/ Electrical/ ETC/ CSE/ IT/ AIDS Engineering

Semester I/II	Subject Code: 1BCC01P-J / 2BCC01P-J	Name of Subject: Painting	
Total Hours Distribution per week			
Total Credit: 2	Lecture (L): --	Tutorial (T):	Practical (P): 4 Hrs
Examination Scheme			
Continuous Assessment	End Sem Examination	Total Marks	Examination Duration:
100 Marks	--	100 Marks	--

Course Objectives	
1	To enhance the creativity of the students by inculcating painting skills.
2	To nurture creativity and imagination in students.
3	To prepare students to overcome the futuristic challenges in the field of painting.

Course Outcomes	
After completion of syllabus, the student is able to	
1	Recognize the symbolic and narrative possibilities inherent in painting and drawing
2	Identify a variety of historical and contemporary approaches to representational drawing.
3	Apply variety of techniques and different methods of painting.
4	Demonstrate basic concept of Art, its meaning, definitions, and basic elements of visual Art.

SYLLABUS

Details of Topic with List of Practicals	
Unit 1: Introduction and handling of water color and acrylic color-	Introduction, Difference between water color and acrylic color, use of acrylic paint with water.
Practical: 1.	Draw geometrical shapes and construct for design
2.	Marking & Cutting different Drawing Paper as per given size.
Unit 2: Create landscape and abstract Painting-	Introduction, painting demonstration, create an abstract image, techniques used in landscape painting.

1. Universal Human Values

**Rashtrasant Tukadoji Maharaj Nagpur University,
Nagpur Faculty of Engineering and Technology
B.E 3rd sem (IT)**

Subject: Universal Human Values (Theory)

CREDITS: 02

Teaching Scheme: 2 Hours/Week:

Examination Scheme:

University Assessment: 35 Marks

College Assessment: 15 Marks

Aim: To inculcate sensitivity among students towards themselves and their surrounding including family, society and nature

Objective: The objective of the course is four fold:

1. Development of a holistic perspective based on self-exploration, about themselves (human being), family, society and nature/existence.
2. Understanding (or developing clarity) of the harmony in the human being, family, society and nature/existence
3. Strengthening of self-reflection.
4. Development of commitment and courage to act.

Course outcomes: By the end of the course,

1. Students are expected to become more aware of themselves, and their surroundings (family, society, nature)
2. Students would become more responsible in life, and in handling problems with sustainable solutions, while keeping human relationships and human nature in mind.
3. They would have better critical ability.
4. They would also become sensitive to their commitment towards what they have understood (human values, human relationship and human society).

Unit 1

Value education, definition, need for value education. The content and the process of value education, basic guidelines for value education, self-exploration as a means of value education, happiness and prosperity as

“Service to the Society through Quality Technical Education”

part of value education. (6 hours)

Unit 2

Harmony of self with body, coexistence of self and body, understanding the needs of self and the needs of body, understanding the activities in the self and the activities in the body. (6 hours)

Unit 3

Values in relationship, the five dimensions of human endeavor, the holistic perception of harmony in existence. (6 hours)

Unit 4

Basics for ethical human conduct, defects in ethical human conduct, human rights violations and social disparities, value based life. (6 hours)

Lecture: 4 Hours/week

Tutorial: Nil

Examination Scheme:

Theory: T (U): 80 Marks T (I): 20 Marks

Duration of University Exam. : 03 Hours

=====

Objective:

Study of this subject provides an understanding of the scope of an industrial economics and entrepreneurship development, key areas of business development, sources of finance, project preparation, methods of taxation and tax benefits, significance of entrepreneurship and economic growth, application of engineering skills in entrepreneurial activities etc.

UNIT I:

Industrial economics, Types of Business structures, top and bottom line of the organization, economic analysis of business, economics of operations, economic prudence in business.

UNIT II:

Market structures- Monopoly, Oligopoly, and Monopolistic competition. Pricing strategies, business integration- forward backward integration, economies of scale, diseconomies of scale, liberalization, privatization and globalization. Business cycles, optimum size of firm.

UNIT III:

The functions of central bank and commercial banks, Foreign Direct Investment, Free trade vs. Protectionism, Capital formation, Inflation, Recession and stagnation, Inclusive growth, Public-Private partnership for development, Multiplier effect, Accelerator effect.

UNIT IV:

Entrepreneurship meaning, Major Motives Influencing an Entrepreneur, Factors Affecting Entrepreneurial Growth. Project Formulation, Product development, Market Survey and Research, Demand forecasting techniques, Techno Economic Feasibility Assessment – Preparation of Preliminary Project Reports – Project Appraisal – Sources of Information – Classification of Needs and Agencies.

UNIT V:

“Service to the Society through Quality Technical Education”

KDK College of Engineering, Nagpur

(Accredited by NAAC & NBA)

Approved by AICTE, Recognized by UGC under Section 2(f) of the UGC Act, 1956

Affiliated to Rashtrasant Tukadoji Maharaj Nagpur University

Need – Sources of Finance, Term Loans, Capital Structure, venture capital. Angel funding, Financial Institution, management of working Capital, Costing, Break Even Analysis, Network Analysis Techniques of PERT/CPM – Taxation – Direct, Indirect Taxes.

UNIT VI:

Sickness in small Business, Major problems faced by SSIs, Foreign Direct Investments and threat to SSI, Technical consultancy organizations, safeguard measures against variation in currency value, Government Policy for Small Scale Enterprises, tax holidays, and incentives to SSIs.

University Syllabus for B.E. III Semester (IT)

Course Code					
Category	Mandatory Courses				
Course Title	Environmental Science				
Scheme & credits	L	T	P	Credits	Semester
	2	0	0	0	III

Course Outcomes

On successful completion of the course, the students:

14. Identify different types of air pollutions as well as explain their causes, detrimental effects on environment and effective control measures.
15. Recognize various sources of water pollutants and interpret their causes and design its effective control measure
16. Illustrate various types of pollutants and waste management.
17. Analyze various social issues related to environment and challenges in implementation of environmental laws.

Syllabus

Unit-I Air pollution and its control techniques: (6 lectures)

Contaminant behavior in the environment, Air pollution due to SO_x, NO_x, photochemical smog, Indoor air pollution Natural pathways for degradation: Carbon cycle, Sulphur cycle, Nitrogen cycle, Oxygen cycle. Factors responsible for altering the composition of atmosphere (deforestation, burning of fossil fuels, industrial and vehicular emissions, CFCs). Techniques to control Air pollution, ambient air quality and continuous air quality monitoring, Control measures at source, Kyoto Protocol, Carbon Credits.

Unit-II Water pollution and its control techniques: (6 lectures)

Major sources of water pollution: Eutrophication, acid mine drains, pesticides and fertilizers, dyeing and tanning, marine pollution, microplastics Techniques to control water pollution: Conventional waste water treatment-types of sewage, sewerage system, alternative systems, primary, secondary and tertiary processes including aerobic and anaerobic techniques, safe disposal and its utility. Treatment schemes for waste water from dairy, textile, power plants, pharmaceutical industries, and agro based industries such as rice mills

Unit-III Other Environmental Pollution & Waste Management: (6 lectures)

Soil pollution: Soil around us, Soil water characteristics, soil pollution. Causes, effects & control : noise pollution, nuclear & radiation hazards, marine pollution (Oil spills & Ocean Acidification) Solid waste management: Composting, vermiculture, landfills, hazardous waste treatment, bioremediation technologies,

Affiliated to Rashtrasant Tukadoji Maharaj Nagpur University

conventional techniques (land farming, constructed wetlands), and phytoremediation. Degradation of xenobiotics in environment: Petroleum hydrocarbons, pesticides, heavy metals Introduction, types of e-wastes, environmental impact, e-waste recycling, e-waste management rules.

Unit-IV Social Issues and the Environmental Laws (6 lectures)

Concept of Sustainable development Water conservation, rain water harvesting, watershed management Resettlement and rehabilitation of people; its problems and concerns. Environmental Laws (brief idea only) Environment Protection Act, Air (Prevention and Control of Pollution) Act, Water (Prevention and control of Pollution) Act, Wildlife Protection Act, Forest Conservation Act Issues involved in enforcement of environmental legislation. Different government initiatives (brief idea only)- National ambient air quality standard 2009, Swachh Bharat Abhiyan, National afforestation program and Act- 2016, National River conservation plan and National Ganga River basin authority, Formation of National Green Tribunal

Activity

1. Field Trip & Report Writing
2. Case-study & Report Writing

Books suggested:

- 1) Benny Joseph, Environmental Studies, Mc Graw Hill Education (India) Private Limited
- 2) B. K. Sharma, Environmental Chemistry, Goel Publishing House, Meerut
- 3) P Aarne Vesilind, J. Jeffrey Peirce and Ruth F. Weiner, Environmental Pollution and Control, Butterworth-Heinemann
- 4) D. D. Mishra, S. S. Dara, A Textbook of Environmental Chemistry and Pollution Control, S. Chand & Company Ltd.
- 5) Shree Nath Singh, Microbial Degradation of Xenobiotics, Springer-Verlag Berlin Heidelberg
- 6) Indian Environmental Law: Key Concepts and Principles edited by Shibani Ghosh, Publisher, Orient BlackSwan, 2019. ISBN, 9352875796.
- 7) P. Thangavel & Sridevi, Environmental Sustainability: Role of Green technologies, Springer publications

ENERGY MANAGEMENT AND AUDIT

Subject Code : BTCHEE701T

Teaching Scheme

Theory-03Hours/Week

Examination Scheme

Th (U)=70 M (I)=30 M

Duration of University Exam:- 3 Hours

Course Objective:

- | | |
|---|--|
| 1 | To understand the need of energy audit. |
| 2 | To impart the knowledge about mechanism of energy audit. |

Course Outcome:

After Successful Completion of this course students will be able to :

- | | |
|------|--|
| CO 1 | Explain present energy scenario with need of energy audit and energy conservation. |
| CO 2 | Recommend appropriate type of Energy Audit looking into user requirements. |
| CO 3 | Prepare process flow, material and energy balance diagrams. |
| CO 4 | Prepare energy action plan and strategy for monitoring and targeting as expected of Energy manager |
| CO 5 | Select proper energy conservation mechanism for Electrical and Mechanical Systems. |

Unit 1:Basics of Energy Management and Conservation

(08 Hrs)

Global and Indian energy scenario, Global environmental concerns, Climate Change, Concept of energy management, energy demand and supply,Energy Conservation -Basic concepts, Energy conservation in household, transportation, agricultural, service and industrial sectors, Lighting & HVAC systems in buildings.

Unit2:Energy Audit

(07 Hrs)

Definition, need, and types of energy audit, Energy management (audit) approach, Understanding energy costs, bench marking, Energy performance, Energy audit instruments, Highlights of Energy Conservation Act.

Unit3 :Material and Energy balance

(06 Hrs)

Facility as an energy system, Methods for preparing process flow, material and energy balance diagrams, Cogeneration and waste heat recovery.

Unit4: Energy Action Planning, Monitoring and Targeting

(07Hrs)

Energy Action Planning –Key elements, Force field analysis, Energy policy, roles and responsibilities of energy manager and energy auditors.

Monitoring and Targeting - Defining monitoring & targeting, Elements of monitoring & targeting, Managerial functions in Monitoring and Targeting.

Unit 5: Electrical Energy and Thermal Energy Management

(08Hrs)

Electrical Energy Management - Methods to minimize supply-demand gap, reactive power management, demand side management, energy conservation in electric motors.

Thermal Energy Management –Energy conservation in boilers ,steam turbines and furnaces.

18 Electrical Installation Design

RASHTRASANT TUKADOJI MAHARAJ NAGPUR UNIVERSITY, NAGPUR

B.TECH. (Electrical Engineering) (CBCS)

7th Semester Electrical Engineering (CBCS)

Syllabus of Professional Elective : IV

ELECTRICAL INSTALLATION DESIGN

Subject Code : BTCHEE702T

Teaching Scheme

Theory-03Hours/Week

Examination Scheme

Th (U)=70 M (I)=30 M

Duration of University Exam:- 3 Hours

Course Objective:	
1	To learn methodology of electrical loads, types of electric loads & selection of busbar and cables
2	To study switching and protection devices along with short circuit calculations.
3	To study Power and control circuit for industrial application utilizing Reactive power Management.
4	To learn industrial installations and earthing system design.
5	To study design of substations used for industrial installations.

Course Outcome: After Successful Completion of this course students will be able to	
CO 1	Understand concept of electrical load assessment and basics of busbar and cables.
CO 2	Identify switches for smooth functioning of protective scheme utilized for short circuit calculations.
CO 3	Analyze Power and control circuit for industrial application utilizing Reactive power Management.
CO 4	Apply industrial installations and earthing system design.
CO 5	Infering the design of 11kV and 33 kV substations for industrial installations .

Unit 1:

Electrical load assessment:

(08 Hrs)

Categories of load, types of loads, connected load, demand factor, Maximum demand, diversity factor, load factor, power factor, TOD Tariff, Industrial Electric Bills.

Cables, conductors & bus-bars:

Construction, selection, installation, overload & short circuit ratings, rating factors; Overhead line conductors.

Unit 2:

Switching & protection devices:

(07 Hrs)

Types, specifications; selections of isolators, switches, switch fuse units, MCB, ELCB, MCCB, ACB, VCB, SF6 breakers,

Symmetrical Short Circuit Calculations:

Determining symmetrical short circuit currents at various locations for selecting proper circuit breaker rating & determining value of series reactors for limiting short circuit current.

Unit 3: (07 Hrs)

Electric supply to Induction Motors in industries:

Types of motors, SLD and working of DOL/ Star-Delta/ Autotransformer starters; types, specifications,

Reactive power management in industries:

Reactive power compensation in industries using static capacitors, use of Power Triangle, Calculating payback period for capacitor investment due to reduced system currents.

Unit 4: (07 Hrs)

Design of Industrial Electrical Installations:

Preparing load list, assessing various factors associated with loads, selection of transformer, busbars, cables, switchgear, protective devices, earthing system, testing, commissioning.

Unit 5: (07 Hrs)

Substations:

11kV & 33 kV, indoor/ outdoor substations, plan/ elevations, Earthing Arrangement, types of earthing, methods of measurement of earthings. IE Rules applicable to residential, commercial & industrial installations.

19. Electric and Hybrid Vehicles

RASHTRASANT TUKADOJI MAHARAJ NAGPUR UNIVERSITY, NAGPUR

B.TECH. (Electrical Engineering) (CBCS)

7th Semester Electrical Engineering (CBCS)

Syllabus of Professional Elective : V

ELECTRIC AND HYBRID VEHICLES

Subject Code : BTCHEE703T

Teaching Scheme

Theory-03Hours/Week

Examination Scheme

Th (U)=70 M (I)=30 M

Duration of University Exam:- 3 Hours

Course Objective: The students will be able to

1	Choose a suitable drive scheme for developing an electric hybrid vehicle depending on Resources.
2	Design and develop basic schemes of electric vehicles and hybrid electric vehicles.
3	Choose proper energy storage systems for vehicle applications
4	Identify various communication protocols and technologies used in vehicle networks.

Course Outcome:

After Successful Completion of this course students will be able to demonstrate the ability to have:

CO 1	Explain electric vehicle characteristics and typologies.
CO 2	Identify and analyze the process of power management system
CO 3	Analyze various power electronics devices in electric vehicles.
CO 4	Outline the types and size of electric motors in electric and hybrid vehicles.
CO 5	Identifying electric motor and internal combustion engine match and energy management strategies.

Unit-I : Introduction to Electric Vehicle (EV) & Hybrid Vehicle(HV):

(07Hrs)

A brief history of Electric and Hybrid vehicles, basic architecture of hybrid drive train and analysis of series drive train., vehicle motion and the dynamic equations for the vehicle, types of HV and EV, advantages over conventional vehicles, limitations of EV and HV, impact on environment of EV and HV technology, disposal of battery, cell and hazardous material and their impact on environment.

Unit-2 : Power Management and Energy Sources of EV and HV:

(08Hrs)

Power and Energy management strategies and its general architecture of EV and HV, various battery sources, energy storage, battery based energy storage and simplified models of battery, Battery Management Systems (BMS), fuel cells, their characteristics and simplified models, Super capacitor based energy storage, its analysis and simplified models, flywheels and their modeling for energy storage in HV/BEV, hybridization of various energy storage devices, Selection of the energy storage technology.

Unit-3 :Power Converters:

(07 Hrs)

Introduction, various power electronics converter typologies and its comparisons, Control of converter operations in EV and HV, battery chargers used in EV & HV. DC-DC converters for EVs, Buck and Buck-Boost Converters, Multi-quadrant DC-DC converters, DC-DC converter applications, DC-AC converters for EVs, Three-phase DC-AC converters, Voltage control of DC-AC inverters using PWM.

Unit-4 : DC and AC Machines & Drives in EV & HV:

(07 Hrs)

Various types of motors, selection and size of motors, Induction motor drives and control characteristics, Permanent magnet motor drives and characteristics, Brushed & Brush-less DC motor drive and characteristics, switched reluctance motors and characteristics, IPM motor drives and characteristics, mechanical and electrical connections of motors.

Unit-5 : Integration of Subsystems:

(07Hrs)

Matching the electric machine and the internal combustion engine (ICE), Sizing the propulsion motor, sizing the power electronics, selecting the energy storage technology, Communications, supporting subsystems.

Energy Management Strategies: Introduction to energy management strategies used in hybrid and electric vehicle, classification of different energy management strategies, comparison of different energy management strategies, implementation issues of energy strategies.

Unit 1 : Multidisciplinary nature of environmental studies

Definition, scope and importance

(2 lectures)

Need for public awareness.

III

Unit 2 : Natural Resources :

Renewable and non-renewable resources :

Natural resources and associated problems.

a) Forest resources : Use and over-exploitation, deforestation, case studies. Timber extraction, mining, dams and their effects on forest and tribal people.

b) Water resources : Use and over-utilization of surface and ground water, floods, drought, conflicts over water, dams-benefits and problems.

c) Mineral resources : Use and exploitation, environmental effects of extracting and using mineral resources, case studies.

d) Food resources : World food problems, changes caused by agriculture and overgrazing, effects of modern agriculture, fertilizer-pesticide problems, water logging, salinity, case studies.

e) Energy resources : Growing energy needs, renewable and non renewable, energy sources, use of alternate energy sources. Case studies.

f) Land resources : Land as a resource, land degradation, man induced landslides, soil erosion and desertification. Role of an individual in conservation of natural resources. Equitable use of resources for sustainable lifestyles. (8 lectures)

Unit 3 : Ecosystems

- Concept of an ecosystem.
- Structure and function of an ecosystem.
- Producers, consumers and decomposers.
- Energy flow in the ecosystem.
- Ecological succession.
- Food chains, food webs and ecological pyramids.
- Introduction, types, characteristic features, structure and function of the following ecosystem :-
 - a. Forest ecosystem
 - b. Grassland ecosystem
 - c. Desert ecosystem
 - d. Aquatic ecosystems (ponds, streams, lakes, rivers, oceans, estuaries)

(6 lectures)

Unit 4 : Biodiversity and its conservation

- Introduction – Definition : genetic, species and ecosystem diversity.
- Biogeographical classification of India
- Value of biodiversity : consumptive use, productive use, social, ethical, aesthetic and option values
- Biodiversity at global, National and local levels.
- India as a mega-diversity nation
- V
- Hot-spots of biodiversity.
- Threats to biodiversity : habitat loss, poaching of wildlife, man-wildlife conflicts.
- Endangered and endemic species of India
- Conservation of biodiversity : In-situ and Ex-situ conservation of biodiversity.

(8 lectures)

Unit 5 : Environmental Pollution

Definition

- Cause, effects and control measures of :-
 - a. Air pollution
 - b. Water pollution
 - c. Soil pollution
 - d. Marine pollution
 - e. Noise pollution
 - f. Thermal pollution
 - g. Nuclear hazards
- Solid waste Management : Causes, effects and control measures of urban and industrial wastes.
- Role of an individual in prevention of pollution.
- Pollution case studies.
- Disaster management : floods, earthquake, cyclone and landslides.

(8 lectures)

"Service to the Society through Quality Technical Education"

KDK College of Engineering, Nagpur

(Accredited by NAAC & NBA)

Approved by AICTE, Recognized by UGC under Section 2(f) of the UGC Act, 1956

Affiliated to Rashtrasant Tukadoji Maharaj Nagpur University

VI

Unit 6 : Social Issues and the Environment

- From Unsustainable to Sustainable development
- Urban problems related to energy
- Water conservation, rain water harvesting, watershed management
- Resettlement and rehabilitation of people; its problems and concerns. Case Studies
- Environmental ethics : Issues and possible solutions.
- Climate change, global warming, acid rain, ozone layer depletion, nuclear accidents and holocaust. Case Studies.
- Wasteland reclamation.
- Consumerism and waste products.
- Environment Protection Act.
- Air (Prevention and Control of Pollution) Act.
- Water (Prevention and control of Pollution) Act
- Wildlife Protection Act
- Forest Conservation Act
- Issues involved in enforcement of environmental legislation.
- Public awareness.

(7 lectures)

Unit 7 : Human Population and the Environment

- Population growth, variation among nations.
- Population explosion – Family Welfare Programme.

VII

- Environment and human health.
- Human Rights.
- Value Education.
- HIV/AIDS.
- Women and Child Welfare.
- Role of Information Technology in Environment and human health.
- Case Studies.

(6 lectures)

Unit 8 : Field work

- Visit to a local area to document environmental assetsriver/ forest/grassland/hill/mountain
- Visit to a local polluted site-Urban/Rural/Industrial/Agricultural
- Study of common plants, insects, birds.
- Study of simple ecosystems-pond, river, hill slopes, etc.

(Field work Equal to 5 lecture hours)

21. Renewable Energy Sources

III Semester B.E. (Electrical Engineering)

RENEWABLE ENERGY STUDIES

Total Credit- 04

Subject Code:-BEEE3O5T

Teaching Scheme

Theory-03 Hours/Week

Tutorial/ Activity -01 Hours/Week

Practical:-

Examination Scheme

Th (U)= 70 Th(I)=30

Duration of University Exam:- 3 Hours

Course Objectives

Students will be able to –

- Demonstrate understanding of the different types of renewable energy technologies that are currently available, and how they are used to provide energy.
- Identify strengths and limitations associated with the different renewable energy technologies.
- Identify the current major uses of energy (i.e., in agriculture, manufacturing, residential, etc.).

Course Outcomes:

After studying the course, the students will be able to demonstrate the ability to

- CO1.** Memorize the fundamental of solar radiation geometry
- CO2.** Identify and analyse the process of power generation through solar photovoltaic
- CO3.** Highlighting the various applications of Solar Energy.
- CO4.** Outline the site requirement criteria for wind farm & compare different types of wind generators.
- CO5.** Identifying non-conventional Energy sources such as Geothermal, MHD, Biomass, Fuel cell, Tidal, Ocean for generating Electricity.

Unit I- Solar Radiation & its Measurement

(06 Hrs)

Solar Radiation & its Measurement: Solar Constant, Solar radiation at earth's surface, solar radiation geometry, solar radiation measurement, estimation of average solar radiation, solar radiation on tilted surfaces.

Unit 2 – Solar Photovoltaic power generation

(10 Hrs)

Solar Photovoltaic power generation: Physics of solar cells, Characteristic of solar cell, series and parallel connection, types of solar cell, module manufacturing, partial shading, bypass and blocking diode, load calculation, different panel calculations and selection (Monocrystalline, Polycrystalline etc), Calculation of Solar rooftop setup (rating): stand alone PV system with battery and grid connected PV system with Net Metering, Introduction to MPPT.

KDK College of Engineering, Nagpur

(Accredited by NAAC & NBA)

Approved by AICTE, Recognized by UGC under Section 2(f) of the UGC Act, 1956

Affiliated to Rashtrasant Tukadoji Maharaj Nagpur University

Unit-3 Application of Solar Energy

(07 Hrs)

Application of Solar Energy: Solar water heating, space heating, space cooling, solar thermal heat conversion, Solar Cooking, Solar pumping, Solar Water pumping for agriculture purposes, Calculation of solar setup required in solar water pumping, Solar Green Houses, Hydrogen production from Solar Energy.

Unit – 4 Wind Energy

(10 Hrs)

Basic principles of wind energy conversion, wind energy conversion system, wind data & energy estimation, site selection consideration, basic components of wind energy conversion system (WECS), classification of WEC system, generating system, energy storage, application of wind energy. Stand-Alone and Grid Connected Wind-Electrical Power System

Unit- 5 Other Nonconventional Energy Source

(07 Hrs)

Brief Introduction to operating principles only: Small scale hydro electric power generation, Energy from Bio –Mass, Geothermal Energy, MHD power generation, Fuel cell, Energy from Ocean, Ocean thermal electric conversion (OTEC), Claude & Anderson cycles, Hybrid cycle, Energy from Tides ,Estimation of Energy & Power in simple single basin ,Tidal system

Professional Ethics Syllabus
(Theory) BEME405T**

Semester	Course Title (Subject)	Hours / Week			Credits	Maximum Marks			Exam Duration (Hrs.)
		L	T	P		Continual Assessment	University Examination	Total	
IV	Professional Ethics	3	-	-	3	30	70	100	03

Sr. No.	Course Objective The objective of this course is–
1	The objective of this course is to inculcate the sense of social responsibility among learners and to make them realize the significance of ethics in professional environment so as to make them a global citizen
Course Outcomes	
After successful completion of this course the student will be able to:	
CO1	Understand basic purpose of profession, professional ethics and various moral and social issues
CO2	Analyze various moral issues and theories of moral development
CO3	Realize their roles of applying ethical principles at various professional levels
CO4	Identify their responsibilities for safety and risk benefit analysis.
CO5	Understand their roles in dealing various global issues

26. Elective-III: Renewable Energy Systems

RASHTRASANT TUKADOJI MAHARAJ NAGPUR UNIVERSITY, NAGPUR

B.TECH. (Electrical Engineering) (CBCS)

7th Semester Electrical Engineering (CBCS)

Syllabus of Professional Elective : V

INTRODUCTION TO SMART GRID

Subject Code : BTCHEE703T

Teaching Scheme

Theory-03Hours/Week

Examination Scheme

Th (U)=70 M (I)=30 M

Duration of University Exam:- 3 Hours

Course Objective: The students will be able to

1	To provides overview of smart grid and its potential in different types of power sectors
2	To focus on background and fundamental building blocks of smart grid.
3	To emphasizes on renewable energy source integration in present grids as well as in micro and nano grid.

Course Outcome:

After Successful Completion of this course students will be able to demonstrate the ability to have:

CO 1	Present energy scenario and feature s of smart grid
CO 2	Identify components and computational tools for smooth functioning of smart grid.
CO 3	Analyze the various protection issues of smart grid.
CO 4	Design smart grid with options like automation.
CO 5	Sustainable energy options for the smart grid.

Unit 1: Introduction to Smart Grid

(06 Hrs)

Introduction to Smart Grid, need and importance of Smart Grids compared to existing system, Architecture of Smart Grid, Elements and technologies of Smart Grid system, Indian Electricity Grid Codes and Indian energy scenario, smart grid market.

Unit 2: Smart grid Communication and Performance

(08 Hrs)

Communication and measurement requirements, Network need for diverse Smart Grid applications, wired and wireless communication technologies with challenges, smart meters, Congestion management effect, Static Security assessment (SSA) and contingencies.

Unit 3: Smart Grid Protection

(07 Hrs)

Introduction, Protection of micro grids and smart grids, different protection issues in Smart Grid, IEC 61850 & communication-aided protection systems

Unit 4: Computational Tools for Smart Grid Design

(07 Hrs)

Introduction to computational tools, Decision support Tools (DS), Heuristic Optimization, Evolutionary Computational Techniques, Adaptive Dynamic Programming Techniques, Hybridizing optimization techniques and applications to the smart grid, Computational Challenges.

27. Industrial Economics and Entrepreneurship Development

Rashtrasant Tukadoji Maharaj Nagpur University, Nagpur

**Electronics and Communication/ Electronics & Telecommunication
Engineering/Electronics Engineering
B.Tech.5 th Semester**

**Subject: INDUSTRIAL ECONOMICS AND ENTREPRENEURSHIP
DEVELOPMENT.**

Examination Scheme:

Units: 05.

**Marks: Internal - 30
External - 70**

Objective

Study of this subject provides an understanding of the scope of an industrial economics and entrepreneurship development, key areas of business development, sources of finance, project preparation, methods of taxation and tax benefits, significance of entrepreneurship and economic growth, application of engineering skills in entrepreneurial activities etc.

Course Outcomes: After completing the course, students will be able to:

CO1. Understand different types of business structure.

CO2. Acquire the knowledge of different market structures and New economic policy

CO3. Grasp the functions of banks, taxations system and implications of Inflation.

CO4. Identify various sources of finance

CO5. Analyse the problems of Small Scall Industries and government’s policies for them.

- 1. Industrial economics, Types of Business structures, top and bottom line of the organization, economic analysis of business, economics of operations, economic prudence in business.**
- 2. Market structures- Monopoly, Oligopoly, and Monopolistic competition. Pricing strategies, business integration- forward backward integration, economies of scale, diseconomies of scale, liberalization, privatization and globalization, Business cycles, optimum size of firm.**
- 3. The functions of central bank and commercial banks, Foreign Direct Investment, Free trade vs. Protectionism, Inflation, Recession, Inclusive growth, Public-Private partnership for development**

CREDITS: 02

Teaching Scheme

Examination Scheme

Lectures: 2 Hours/Week
Hours

Duration of Paper: 02

Tutorial: 1 hour/week

University

Assessment: 35 Marks

College Assessment: 15 Marks

Objective: At the end of the semester, students will have enough confidence to face competitive examinations (IELTS/ TOEFL/CAT/ MAT/ XAT/SNAP/GMAT/GATE etc.) to pursue masters degree. They will also acquire language skills required to write their Reviews/Projects/Reports. They will be able to organize their thoughts in English and hence face job interviews more confidently.

Course Outcomes: After completing the course, the students will be able to

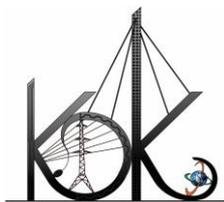

1. acquire knowledge of structure of language.
2. Build vocabulary and face interview process and can become employable.
3. develop business writing skills.
4. Understand technical and scientific writing skills.

Course Structure

Unit I. Functional Grammar:

Syllabus of Electrical Safety & Standards.

Subject Code : BTCHEE801T

Teaching Scheme

Theory-03Hours/Week

Examination Scheme

Th (U)=70 M (I)=30 M

Duration of University Exam:- 3 Hours

COURSE OUTCOMES

Upon successful completion of the course, the student must be able to

CO1	Understand the Indian power sector organization and Electricity rules, electrical safety in residential, commercial, agriculture, hazardous areas .
CO2	Outline the electrical safety during installation, testing and commissioning procedure.
CO3	Make use of specification of electrical plants and classification of safety equipment for various hazardous locations.
CO4	Understand Safety Management & Standards in Electrical Systems.

SYLLABUS

Unit No.	Contents	Hours
1	Introduction To Electrical Safety, Shocks And Their Prevention: Terms and definitions, objectives of safety and security measures, Hazards associated with electriccurrent and voltage, who is exposed, principles of electrical safety, Approaches to prevent Accidents, scope of subject electrical safety. Primary and secondary electrical shocks, possibilities of getting electrical shock and its severity, medical analysis of electric shocks and its effects, shocks due to flash/ Spark over's, prevention of shocks, safety precautions against contact shocks, flash shocks, burns, residential buildings andshop.	8
2	Electrical Safety in Residential, Commercial and Agricultural Installations: Wiring and fitting –Domestic appliances –water tap giving shock –shock from wet wall –fan firing shock –multi-storied building –Temporary installations – Agricultural pump installation –Do's and Don'ts for safety in the use of domestic appliances.	7
3	Electrical Safety during Installation, Testing and Commissioning, Operation and Maintenance: Preliminary preparations –safe sequence –risk ofplant and equipment –safety documentation –field quality and safety –personal protective equipment –safety clearance notice –safety precautions –safeguards for operators –safety.	7
4	Electrical Safety in Hazardous Areas: Hazardous zones –class 0,1 and 2 – spark, flashovers and corona discharge and functional requirements – Specifications of electrical plants, equipment's for hazardous locations – Classification of equipment enclosure for various hazardous gases and vapours – classification of equipment/enclosure for hazardous locations.	6
5	Safety Management of Electrical Systems: Principles of Safety Management, Management Safety Policy, Safety organization, safety auditing, Motivation to managers, supervisors, employees. Review of IE Rules and Acts ,their Significance: Objective and scope – ground clearances and section clearances – standards on electrical safety - safe limits of current, voltage –Rules regarding first aid and fire fighting facility. The Electricity Act, 2003,	8

30. Project Phase-2

B. Tech. Eighth Semester (CBCS)

(Electronics /Electronics & Communication/ Electronics & Telecommunication Engineering)

Project phase 2

Subject Code: BEETC-803P

[L:0 -P:12- T:0 - 12]

Credit: 0-6-0-6

Course Objectives:

The object of Project Work II is to enable the student to extend further the extend project taken up under Project Phase-I, either fully theoretical/practical or involving both theoretical and practical work, under the guidance of a Supervisor from the Department alone or jointly with a Supervisor drawn from R&D laboratory/Industry

Course Outcome: By the end of the course, the students shall be able to

1. Analyze or Design the Electronics /telecommunication /allied Engineering problems by using appreciate methodology in a team work.
2. Interpret the communication skills of team members and
3. Use of Modern tools in the field of Electronics Engineering

Guidelines:

- In continuation to semester VII project work, the group of the students shall collect all necessary information pertaining to the project and analyse it.
- The group of the students shall prepare and submit a detailed report on the project.
- Student group shall try to implement project in minimum cost and learn financial aspect of project.
- Preferably project definition shall be in discussion and association with any industry
- The report shall be type written on A4 size papers and hard bound as per prescribed norms.
- Broadly the report shall include: Introduction, Literature Review, Problem definition, Data collection and analysis, Results (Numerical / Experimental), Conclusions and discussions.
- Acquaintance with survey and research methods and their use in conducting systematic investigations, use of data analysis tools, computational methods and style of report, preparation and presentation shall form basis of evaluation.
- The group shall prepare and present a seminar based on this work before an external examiner

31. Universal Human Values

Rashtrasant Tukadoji Maharaj Nagpur University, Nagpur

Faculty of Engineering and Technology

B.E IVthsem (ETC/ECE/EN)

Subject: Universal Human Values (Theory)

CREDITS: 03

Teaching Scheme: 3 Hours/Week:

Examination Scheme: University Assessment: 70 Marks

College Assessment: 30 Marks

Aim: To inculcate sensitivity among students towards themselves and their surrounding including family, society and nature

Objective: The objective of the course is four fold:

1. Development of a holistic perspective based on self-exploration, about themselves (human being), family, society and nature/existence.
2. Understanding (or developing clarity) of the harmony in the human being, family, society and nature/existence
3. Strengthening of self-reflection.
4. Development of commitment and courage to act.

Course outcomes: By the end of the course,

1. Students are expected to become more aware of themselves, and their surroundings (family, society, nature)
2. Students would become more responsible in life, and in handling problems with sustainable solutions, while keeping human relationships and human nature in mind.
3. Students would understand values in relationship.
4. Students would understand the role of a human being in ensuring harmony in society and nature.
5. Students would distinguish between ethical and unethical practices at work place and would contribute for making a value based society

Unit 1

Value education, definition, need for value education. The content and the process of value education, basic guidelines for value education, self-exploration as a means of value education, happiness and prosperity as part of value education.

(6 hours)

Unit 2

Harmony of self with body, coexistence of self and body, understanding the needs of self and the needs of body, understanding the activities in the self and the activities in the body, Understanding Harmony of I with the body, Sanyam, Aspects of Sanyam, Types of Sanyam,

KDK College of Engineering, Nagpur

benefits and obstacles in the path of Sanyam, Swasthya, Aspects of Swasthya, Determinants of Swasthya, Ways to maintain Swasthya.

(8 hours)

Unit 3

Values in relationship (nine universal values in relationships), Understanding values in human-human relationship; Meaning of Justice, Elements of Justice, Understanding meaning of Trust; Elements, Types and Dimensions of Trust, Difference between intention and competence.

(6 hours)

Unit 4

The five dimensions of human endeavour, the holistic perception of harmony in existence, Understanding harmony in society: Resolution, Prosperity, fearlessness (trust) and co-existence as comprehensive Human Goals.

(8 hours)

Unit 5

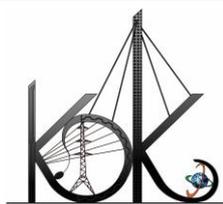

Basics for ethical human conduct, definitiveness in ethical human conduct, human rights violations and social disparities, value based life, Competence in professional ethics

(8 hours)

Total Credit:03	Lecture (L): 03 Hrs	Tutorial/Activity (T/A): 0 Hrs.	Practical (P): Nil Hrs.
Subject Code	BECVE605T	Name of Subject: Environmental Engineering (Open Elective-I)	
Examination Scheme			
Internal Marks:	University Marks:	Minimum Passing Marks:	Examination Duration:
30 Marks (15 Marks for sessional examination) (15 Marks for Activity based)	70 Marks	45 Marks	3 Hours

Course Objective	
1	Understanding the concept and principles of environment.
2	To impart knowledge on the sources, effects and control techniques of water pollution.
3	To understand the behaviour of air pollutants and the strategies to control their presence in the ambient atmosphere.
4	To provide a comprehensive insights of the types, sources, generation, storage, collection, transport, processing and disposal of solid waste.

Course Outcome	
After completion of syllabus student able to	
1	Explore the components of biosphere and impact of human activity on environment.
2	Summarize the causes and sources of pollutants, and their impact on global environment.
3	Develop ethics and scientific awareness about waste generation and treatment.
4	Identify sources and types of wastes and its management.
5	Understand noise, noise pollution and control.

SYLLABUS

Unit No.1 Introduction to Environment			
Details of Topic	Allotment of Hours		Mapped with CO Number
	L	T/A	CO
Definition, scope and importance of environmental studies. Ecosystem, types, structure and function of ecosystem.	01		1
Energy flow in ecosystem. Biodiversity and its importance, threats to biodiversity and conservation of biodiversity. Natural resources and associated problems.	02		1
Renewable and non-renewable resources, forest resources- Description, benefits, Effects due to deforestation, Water resources –Use and conservation. Mineral resources–mining activity.	02		1
Role and responsibility of engineer in environmental protection, health and safety. Fire hazards, prevention and precautions. Industrial hazards prevention and protection.	01		1
Protection from air and noise pollution. Environment protection act Wild life protection act. Forest conservation act.	01		1
Population growth aspects and importance and effects on environment. Human health and Human rights. Concept of carbon credits.	01		1
	08		
Unit No.2 Water Pollution & Waste Water Treatment Method			
Details of Topic	Allotment of Hours		Mapped with CO Number
	L	T/A	CO
Water resources, Classification of water, Origin, composition and characteristics of domestic waste water as well as industrial waste water, Biochemical oxygen demand, Water pollution laws and standards.	02		2
Water conservation, watershed management, Rain water harvesting: Definition, methods and benefits.	02		2
Water (prevention and control of pollution) act, Waste water, Classification of waste water, Chemical oxygen demand. Basic processes of water treatment.	01		2

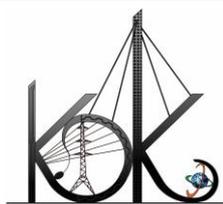

KDK College of Engineering, Nagpur

(Accredited by NAAC & NBA)

Approved by AICTE, Recognized by UGC under Section 2(f) of the UGC Act, 1956

Affiliated to Rashtrasant Tukadoji Maharaj Nagpur University

Meaning of primary, secondary and tertiary treatment.	01		2
Flow chart of a simple effluent treatment plant, Theory of industrial waste treatment, Volume reduction, neutralization and precipitation methods.	01		2
	07		
Unit No.3 Air Pollution			
Details of Topic	Allotment of Hours		Mapped with CO Number
	L	T/A	CO
Standard definition of air pollution, Composition of natural air, Names of air pollutants, Classification of air pollutants, primary and secondary pollutants.	02		3
Classification of source of air pollutants on different bases, Definition of different types of aerosols.	01		3
Effect of air pollution on: human health, material properties, vegetation. Major toxic metals and their effects. Air (prevention and control of pollution) act.	01		3
Major environmental phenomenon e.g., acid rain, global warming, greenhouse effect, ozone layer depletion.	01		3
Air quality standards, Brief description of air pollution laws. Meteorological parameters influencing air pollution Environmental lapse rate, temperature inversion.	01		3
Role of national green tribunal in India, Function of Regulatory boards like CPCB and State Pollution Control Boards	01		3
	07		
Unit No.4 Energy Environment Climate Change			
Details of Topic	Allotment of Hours		Mapped with CO Number
	L	T/A	CO
An overview of Bureau of Energy Efficiency (bee), The National Action Plan on Climate Change (NAPCC),	02		4
Schemes under The National Mission for Enhanced Energy Efficiency (NMEEE),	02		4
Energy Conservation Building Code (ECBC),	01		4
Bio diversity and its conservation, Sustainable development, Kyoto Protocol,	01		4
Conference of Parties (Cop), Clean Development Mechanism (CDM).	01		4
	07		
Unit No.5 Solid Waste Management & Noise Pollution			
Details of Topic	Allotment of Hours		Mapped with CO Number
	L	T/A	CO
Sources and classification of solid waste, Public health aspects, Disposal methods – open dumping, sanitary, land fill, Incineration, composting.	02		5
Potential methods of disposal, Recovery and recycling of paper, glass, metal and plastic Sources of noise pollution.	02		5

33. Ethics in IT

RASHTRASANT TUKADOJI MAHARAJ NAGPUR UNIVERSITY, NAGPUR
FOUR YEAR BACHELOR OF ENGINEERING (B.E.) DEGREE COURSE
SEMESTER: III (C.B.C.S.)
BRANCH: COMPUTER SCIENCE & ENGINEERING

Subject : *Ethics in IT*

Subject Code : BECSE305T

Load	Credits	College Assessment Marks	University Evaluation	Total Marks
3 Hrs. (Theory)	3	30	70	100

Aim: To understand the ethical behavior of individuals, organizations towards IT Profession

Prerequisite(s): None

Course Objectives:

1	Ability to understand and meet ethical standards and legal responsibilities.
2	Create an awareness on professionals Ethics and Human Values.
3	Discuss the Privacy and Anonymity issues, Defamation and Hate Speech
4	Gain the knowledge of Copyrights, Patents and Trade Secret Laws.
5	Create and understand the awareness on Whistle-blowing

Course Outcomes:

At the end of this course Student are able:

CO1	Acquire knowledge about ethical values & principals.
CO2	Understand key issues of privacy protection policies.
CO3	Understand and apply Intellectual Property Rights and related law in reality.
CO4	Understand the core values that shape the ethical behavior of an engineer / IT Professional.
CO5	Identify the multiple ethical interests at stake in a real-world situation.
CO6	Develop cognitive skills in solving social problems.

KDK College of Engineering, Nagpur

(Accredited by NAAC & NBA)

Approved by AICTE, Recognized by UGC under Section 2(f) of the UGC Act, 1956

Affiliated to Rashtrasant Tukadoji Maharaj Nagpur University

Unit I:

[09 Hrs]

An overview of Ethics: Ethics in IT, Ethics for IT professionals and IT users, IT professionals, Ethical behavior, IT professional malpractices, IT users. Educating Employees, contractors and part-time Workers **Computer and Internet Crime:**Types of Exploits, Reducing Vulnerabilities, Establishing a Security Policy, Prevention, Detection, Response.

Unit II:

[07 Hrs]

Privacy: The right of Privacy, Recent History of Privacy Protection, Key Privacy and Anonymity issues, Governmental Electronic Surveillance, Data Encryption, Identity Theft, Consumer Profiling, Workplace Monitoring, Advanced surveillance Technology, Freedom of Expression: Key issues, Controlling Access to Information on the Internet, Defamation and Hate Speech.

Unit III:

[07 Hrs]

Intellectual Property: Copyrights, Patents, Trade Secret Laws, Key Intellectual Property Issues, Plagiarism, Reverse Engineering, Open Source Code, Software Development, Strategies to Engineer Quality Software, Capability Maturity Model Integration for Software, Development of Safety-Critical Systems.

Unit IV:

[06 Hrs]

Ethics of IT Organization: Need for Nontraditional Workers, Contingent Workers H-IB Workers, Whistle-blowing, Protection for Whistle-Blowers, Dealing with Whistle-Blowing Situation.

Unit V:

[07 Hrs]

The Impact of Information Technology on the Quality of Life: The impact of IT on the standard of Living and productivity, The impact of IT on Health care costs, Electronic Health Records, Use of Mobile and Wireless Technology, Telemedicine.

Text books:

1. George Reynolds, “Ethics in information Technology” Cengage Learning

34 Universal Human Values

RASHTRASANT TUKADOJI MAHARAJ NAGPUR UNIVERSITY, NAGPUR
 FOUR YEAR BACHELOR OF ENGINEERING (B.E.) DEGREE COURSE
 SEMESTER: 3rd (C.B.C.S.)
 BRANCH: COMPUTER SCIENCE & ENGINEERING

Subject : *Universal Human Values*

Subject Code : BECSE306T

Load	Credits	College Assessment Marks	University Evaluation	Total Marks
02 Hrs (Theory)	02	15	35	50

Aim: To inculcate sensitivity among students towards themselves and their surrounding including family, society and nature.

Prerequisite(s): None

Course Objectives:

1	Development of a holistic perspective based on self-exploration, about themselves (human being), family, society and nature/existence.
2	Understanding (or developing clarity) of the harmony in the human being, family, society and nature/existence.
3	Strengthening of self-reflection.
4	Development of commitment and courage to act.

Course Outcomes:

At the end of this course Student are able to:

CO1	Become more aware of themselves, and their surroundings (family, society, nature)
CO2	Become more responsible in life, and in handling problems with sustainable solutions, while keeping human relationships and human nature in mind.
CO3	They would have better critical ability.
CO4	Become sensitive to their commitment towards what they have understand (human values, human relationship and human society).

Unit 1

[06 Hrs]

Value education, definition, need for value education. The content and the process of value education, basic guidelines for value education, self-exploration as a means of value education, happiness and prosperity as part of value education.

Unit 2

[06 Hrs]

Harmony of self with body, coexistence of self and body, understanding the needs of self and the needs of body, understanding the activities in the self and the activities in the body.

"Service to the Society through Quality Technical Education"

KDK College of Engineering, Nagpur

(Accredited by NAAC & NBA)

Approved by AICTE, Recognized by UGC under Section 2(f) of the UGC Act, 1956

Affiliated to Rashtrasant Tukadoji Maharaj Nagpur University

Unit 3

[06 Hrs]

Values in relationship, the five dimensions of human endeavour, the holistic perception of harmony in existence.

Unit 4

[06 Hrs]

Basics for ethical human conduct, defects in ethical human conduct, human rights violations and social disparities, value based life.

Text Books:

1. Human Values and Professional Ethics by R R Gaur, R Sangal, G P Bagaria, Excel Books, New Delhi, 2010

Reference Books

2. Human Values, A.N. Tripathi, New Age Intl. Publishers, New Delhi, 2004.
3. Indian Ethos and Modern Management: Amalgam of the best of the ideas from the East and the West, B.L. Bajpai, New Royal Book Bo., Lucknow, 2004
4. Human society in ethics and politics, Bertrand Russel, Routledge Publications, 2009

35. Power Quality

RASHTRASANT TUKADOJI MAHARAJ NAGPUR UNIVERSITY, NAGPUR
B.TECH. (Electrical Engineering) (CBCS)
Syllabus of Professional Elective-VII: Power Quality

8th Semester Electrical Engineering (CBCS)
Subject Code : BTCHEE803T

Course Outcomes:

After the study of this course, the students will be able to:

- CO1: Explain importance of Power Quality and good grounding practices.
- CO2: Describe the causes of flickers and transient over voltages and suggest corrective measures.
- CO3: Discuss the causes and consequences of voltage sags and suggest mitigation techniques
- CO4: Discuss the causes and effects of harmonics and suggest harmonic reduction techniques.
- CO5: Explain the need, objectives and approaches of power quality monitoring and assessment.

Unit 1: Introduction

8 Hours

Importance of power quality, terms, and definitions of power quality as per IEEE std. 1159. such as transients, short and long duration voltage variations, interruptions, short and long voltage fluctuations, imbalance, flickers and transients. Symptoms of poor power quality. Definitions and terminology of grounding. Purpose of groundings. Problems due to poor grounding and good grounding practices.

Unit 2: Flickers and Transient Voltages

6 Hours

RMS voltage variations in power system and voltage regulation per unit system, complex power. Principles of voltage regulation. Various devices used for voltage regulation and impact of reactive power management. Various causes of voltage flicker and their effects. Various means to reduce flickers. Transient over voltages & their sources, impulsive transients, switching transients, Effects & Control of transient voltages.

Unit 3: Voltage Sag, Swells and Interruptions

6 Hours

Definitions of voltage sag and interruptions. Economic impact of voltage sag. Major causes and consequences of voltage sags. Voltage sag characteristics. Voltage sag assessment. Influence of fault location and fault level on voltage sag. Areas of vulnerability. Assessment of equipment sensitivity to voltage sags. Mitigation measures for voltage sags, such as UPS, DVR, SMEs, CVT etc.

Unit 4: Waveform Distortion

8 Hours

Definition of harmonics, inter-harmonics, sub-harmonics. Causes and effect of harmonics. Voltage versus current distortion. Harmonic indices. A.C. quantities under non-sinusoidal conditions. Harmonics series and parallel resonances. Consequences of harmonic resonance. Principles for controlling harmonics. Reducing harmonic currents in loads. K-rated transformer. Computer tools for harmonic analysis. Locating sources of harmonics. Harmonic filtering, passive and active filters. IEEE Harmonic standard 519-1992.

Unit 5: Power Quality Monitoring

8 Hours

Need of power quality monitoring and assessment, Power quality monitoring objectives and requirements. Initial site survey. Power quality Instrumentation. Selection of power quality monitors, selection of monitoring location and period. System wide and discrete power quality monitoring. Setting thresholds on monitors, data collection and analysis. Selection of transducers. Harmonic monitoring, Transient monitoring, event recording and flicker monitoring, Power quality indices and standards.

36. Sustainable Resource Management

RASHTRASANT TUKADOJI MAHARAJ NAGPUR UNIVERSITY, NAGPUR
FACULTY OF SCIENCE & TECHNOLOGY
B. TECH CIVIL ENGINEERING (CHOICE BASED CREDIT SYSTEM)

Sem: VII	Total Hours Distribution per week		
Total Credit:03	Lecture (L): 03 Hrs.	Tutorial/Activity : - 0 Hrs.	Practical (P): - 0 Hrs.
Subject Code	BTCVE702T	Name of Subject: Sustainable Resource Management (Elective IV)	
Examination Scheme			
Internal Marks:	University Marks:	Minimum Passing Marks:	Examination Duration:
30 Marks (15 Marks for sessional examination) (15 Marks for Activity based)	70 Marks	45 Marks	3 Hours

Course Objective

1	Students should be able to get knowledge of natural resources and sustainability
2	Students should be able to learn about Land, Soil and Water resources
3	Students should be able to learn about the different available conventional and non conventional energy resources
4	Students should be able to learn about various available forest and mineral resources
5	Students should be able to get knowledge of Natural Resource Conservation

Course Outcome

After completion of syllabus student able to

1	To be able to understand the various available natural resources with their objectives, demand and Social dimensions related to the sustainability.
2	To be able to understand the various available land, soil and water resources with their objectives, impacts, renewal and management
3	To be in a position to understand various Conventional and Non-renewable Energy Resources
4	To be in a position to understand the forest and mineral resources
5	To be in a position to understand the Natural Resource Conservation system

SYLLABUS

Unit No.1 Natural resources & Sustainability			
Details of Topic	Allotment of Hours		Mapped with CO Number
	L	T/A	CO
Introduction to natural resources, objectives, Types of natural resources	02		1
India-general information of climate, land and soil, water resources, energy resources, agro climatic zones	01		
List of natural resources, Values of natural resources and Demands of Natural Resources	01		
Sustainability- definition, importance, environmental, economical and Social dimensions of sustainability	01		
Global, Regional and Local environmental issues, Insecurity of Resource Degradation, Climate Change	02		
	07		
Unit No.2 Land, Soil and Water resources			
Details of Topic	Allotment of Hours		Mapped with CO Number
	L	T/A	CO
Introduction, objectives, Land resources, Land use pattern in India, Impact of land resource management, Introduction of Waste Land	02		2
Soil- Soil Profile, Soil Classification, Soil Erosion and Soil Degradation, Soil Conservation	01		
Water Resources, Different water resources, Hydrological cycle and its components	02		

KDK College of Engineering, Nagpur

(Accredited by NAAC & NBA)

Approved by AICTE, Recognized by UGC under Section 2(f) of the UGC Act, 1956

Affiliated to Rashtrasant Tukadoji Maharaj Nagpur University

Classification of water resources, Use of Water Resources, characteristics of water resources	01		
Supply and Renewal of Water Resource, Water Resources and Problems - The Indian Scenario	01		
	07		
Unit No.3 Energy Resources			
Details of Topic	Allotment of Hours		Mapped with CO Number
	L	T/A	CO
Energy Resources- Introduction, Objectives and list of Conventional and Non-renewable Energy Resources	01		3
Non-conventional forms of energy - Coal , petroleum , natural gas and lignite, resources and reserves available in India	02		
Renewable energy resources-Solar energy , Solar power; Wind energy, wind farms	01		
Geo-thermal energy ; Hydropower and micro-hydel power ; Tidal energy; Ocean.	01		
Thermal Energy Conversion(OTEC) Technology; Hydrogen as an alternate fuel	02		
	07		
Unit No.4 Forest and Mineral Resources			
Details of Topic :	Allotment of Hours		Mapped with CO Number
	L	T/A	CO
Introduction to forest Resources, Forest vegetation, status and distribution, contribution as resource	01		4
Use and over-exploitation, deforestation. Timber extraction, mining, dams and their effects on forest and tribal people	02		
Forest products, Developing and developed world strategies for forestry	01		
Mineral Resources- Origin of Mineral Resources, Mineral Resource Abundance and Distribution	02		
The Formation of Minerals, Locating and Extracting Mineral Resources	01		
	07		
Unit No.5 Natural Resource Conservation			
Details of Topic	Allotment of Hours		Mapped with CO Number
	L	T/A	CO
Conservation- Introduction, Objectives, Overexploitation of Natural Resources	01		5
Degradation and Depletion of Natural Resources, Land Degradation Deforestation, Soil Erosion	02		
Water Pollution, Air Pollution, Need for Conservation	01		
Key Issues in Natural Resource Management, Land Reclamation	01

37. BECVE605T Environmental Engineering-II

Semester: VI

ENVIRONMENTAL ENGINEERING-II

BECVE605T
(L-3 Hrs/Week, T-1 Hrs/Week); Total Credits-4

Evaluation Scheme: (80/20)
Exam Duration: 3 hrs.

COURSE OUTCOMES: The students shall be able to

1. Use the concept related to water & its quality, sewage, sewer, storm water, etc in its hydraulic design
2. Apply the knowledge of different components of sewer in construction, testing & maintenance of sewers,
3. To test the sample of waste water in the laboratory for physical & chemical characteristics.
4. Take-up functional planning, layout and design of water treatment plant components.
5. Take-up functional planning, layout and design of sewage treatment plant components.
6. Plan for rural sanitation provisions, perform functional design of septic tank,
7. Analyze the industrial waste water for its treatment units.
8. Make use of knowledge & effect of air pollution, solid waste in planning for its prevention and control.

Unit-I

General Aspects of Environmental Engineering – Study of waste water, black water & grey water. System of collection and conveyance of sewage- separate and combined systems, patterns of sewage collection systems. Quantity of storm water and sanitary waste water, Sewer: Types, Shapes, Hydraulic Design (Capacity, Size, Grade, etc.)

Unit - II

Construction of sewer - Shoring, Trenching and laying to grade. Sewer materials, Sewer Appurtenances - manhole street inlets, storm water overflows, inverted syphons, flushing and ventilation: House plumbing systems, sanitary fitting and appliances, traps, anti-syphonage, inspection chambers and intercepting traps. Sewage pumping - location of pumping station and types of pumps. Sewer testing and maintenance.

Unit - III

Physical and chemical characteristics of wastewater, significance of BOD, COD, BOD rate constant, Sewage treatment flow sheet, site selection for sewage treatment plant. Preliminary and primary treatment - Screens, Grit chambers, oil & grease removal. Primary settling tank (including simple design)

Unit- IV

Secondary treatment - Principle of Biological Treatment Activated sludge process, trickling filter, (Indian Standard for disposal), Methods of disposal, Sewage farming, self purification of stream (Streeter Phelp's equation, Oxygen sag curve). Recycle & reuse of sewage (Zero discharge concept). Sludge digestion, sludge drying beds.

Unit - V

Rural sanitation; Pit privy, aqua privy, bio-gas recovery Septic tank including soak pit, including design problem (as per relevant L.S. Code) Sullage collection and disposal

Industrial Waste Water Treatment - Significance of Industrial Waste Water Treatment, important physical and chemical parameters, unit operations and processes (flow equalization, neutralization, adsorption, chemical and biological treatment (in brief)

Unit VI

Air pollution and solid waste: Sources, classification, Effects, prevention and control. Introduction to carbon credit system and climate change

REFERENCE BOOKS

2. S.K.Garg, "Environmental Engineering" -Vol II Standard Publication
3. G.S.Birdie, "Water Supply & Sanitary Engineering"
4. M.J.Macghee, "Water Supply & Sewage" – McGraw Hill Publication
5. M.N.Rao & HV.N.Rao, "Air Pollution" McGraw Hill Publication
6. C.S.Rao, "Environmental Pollution Control Engineering".

38. BECVE 303T ENVIRONMENTAL ENGINEERING – I

Semester : III Semester

Objectives:

1. To prepare students to apply basic knowledge of environmental engineering in conventional civil engineering practice involving water supply engineering in particular.
2. The course will provide students knowledge regarding the sources, of water demands, population forecasting, and conveyance of water.
3. To prepare students to analyze, plan, and design of various phases of water supply systems.
4. To provide the students the knowledge regarding the various characteristics of water, estimation of the quantity of water.
5. The course will provide students with fundamentals of solid waste management

Outcomes:

- a. The students would be able to understand the importance and necessity of water supply.
- b. The students would be able to determine the capacity of water supply scheme.
- c. The students would have the basic knowledge related to the conveyance systems and the appurtenances used.
- d. The students would have knowledge of characteristics of water, drinking water standards and necessity of treatment.
- e. The students would be able to design various units of conventional water treatment plant.
- f. The students would be equipped with the basic knowledge related to design of water supply system.
- g. The students should be able to understand of necessity of treatment, types of treatment processes and disposal methods for solid waste.

Syllabus :

Unit – I

Introduction: Importance and necessity of water supply scheme.

Water Demand: All types of water demand, empirical formulae, factors affecting per capita demand, variation in demand, design period, population forecasting methods and examples.

Sources of water: Rain water, Ground water-springs, infiltration galleries, Dug wells, tube wells, Surface water-stream, lake, river, impounding reservoirs, ponds & sea.

Intake structures: Location, types river, lake, canal, reservoir etc.

Unit – II

Conveyance of water: Types of pipes, joints, fittings, valves & appurtenances.

Hydraulic design aspects: Friction, Manning's, Darcy-Weisbach & Hazen Williams equation and problem.

Rising main and pumps: Concept of rising main, Classification, working, merits and demerits, selection of pumps.

Unit – III

Water quality: Physical, Chemical and bacteriological characteristics of water, Health effects of various water characteristics, Standards of drinking water. (WHO 2011, CPHEEO, IS 10500). Water born diseases

Water treatment: Objective of treatment, unit operations and processes, house hold & community based rural water treatment, decentralized water treatment, flow sheet of conventional water treatment plant.

Aeration: Purpose, types of aerators, design of cascade aerator.

Coagulation and Flocculation: Definition, Principles, types of coagulants and reactions, coagulant doses, types of mixing and flocculation devices.

Unit – IV

Sedimentation: Principles, types of setting basins, inlet and outlet arrangements, simple design of sedimentation tank.

Clariflocculators: Principles and operation.

Filtration: Mechanism of filtration, types of filters-RSF, SSF, Pressure filters, elements of filters sand specification, operational problems in filtration, Design of SSF and RSF, Membrane filtration technique of water treatment,

Unit – V

Disinfection: Purpose, Mechanism, criteria for good disinfectant, various disinfectants, their characteristics, disinfection by chlorination using different forms of chlorine. Types of chlorination.

Distribution systems: Requirements of a good distribution system, methods of distribution systems and layouts, Leakage and leak detector, Study of fire hydrants.

Storage reservoirs for treated water: Types, capacity of reservoir, mass curve.

Unit – VI

Municipal solid waste management : Generation sources, composition, Methods of Collection, transportation, disposal, Recycle, Reuse.

Examples on simple hydraulic design of pipes, estimation of population and water quality, plain sedimentation tanks, cascade aerators, filters, pumps, dose of chlorine). Visit to Water treatment plant (compulsory).

“Service to the Society through Quality Technical Education”

KDK College of Engineering, Nagpur

(Accredited by NAAC & NBA)

Approved by AICTE, Recognized by UGC under Section 2(f) of the UGC Act, 1956

Affiliated to Rashtrasant Tukadoji Maharaj Nagpur University

Subject Code: BECVE 303 P PRACTICAL ENVIRONMENTAL ENGINEERING – I

Semester : III

BECVE 303 P PRACTICAL ENVIRONMENTAL ENGINEERING – I

Any TEN (Total)

I. Any Seven

1. Determination of pH
2. Determination of Conductivity
3. Determination Chlorides
4. Determination of Solid's (**Suspended & dissolved**)
5. Determination of Turbidity
6. Determination of Acidity
7. Determination of Dissolved Oxygen
8. Determination of **Membrane filtration technique.**
9. Determination of Available Chlorine
10. Determination of Residual Chlorine
11. Jar Test
12. Bacteriological Plate count and MPN tests.
13. Determination of Alkalinity.

II. Only demonstration of COD, BOD.

III. Design of WTP using software.

IV. Brief Report on WTP Visit.

39. Air Pollution & Solid Waste Management

FACULTY OF SCIENCE & TECHNOLOGY

B. TECH CIVIL ENGINEERING (CHOICE BASED CREDIT SYSTEM)

Sem: VII	Total Hours Distribution per week		
Total Credit: 3	Lecture (L): 03 Hrs	Tutorial/Activity (T/A): 0 Hrs.	Practical (P): 0 Hrs.
Subject Code	BTCVE703T	Name of Subject: Air Pollution & Solid Waste Management (Elective-V)	
Examination Scheme			
Internal Marks:		Marks:	Minimum Passing Marks:
30 Marks (15 Marks for sessional examination) (15 Marks for Activity based)		70 Marks	45 Marks
			Examination Duration: 3 Hours

Course Objectives:

1.	The course will provide students knowledge regarding different aspects of air pollutants, its sources and effects, meteorological parameters, air sampling
2.	The course will prepare students to design equipments for air pollution to reduce its impact on environment
3.	The course will provide students the knowledge regarding problems arriving in handling large amount of solid waste generated, its collection, transportation, and processing
4.	The course will prepare students to learn emerging technologies for air pollution control, design safe collection and disposal methods.

Course Outcomes:

1.	Students will be able to understand different aspects of air pollutants, its sources and effects on man & materials and Meteorological parameters
2.	Students will be able to understand methods of air sampling & design equipments for air pollution to reduce its impact on environment
3.	Students will be able to understand problems arriving in handling large amount of solid waste generated
4.	Students will be able to understand problems arriving in its collection, transportation, and processing & to design safe collection and disposal methods
5.	Students will be able to learn emerging technologies for air pollution control.

UNIT-I (07 Hrs.)

Introduction to air pollution: Definition, atmosphere & its zones, Classification and sources of air pollutants, Impacts of air pollution on human health, vegetation, animals, building materials, structures, and atmosphere, soil and water bodies, Global and regional environmental issues of air pollution: Ozone depletion, Climate change, Global warming, Acid rain.

Meteorological parameters: Primary and secondary parameters, atmospheric stability, plume behaviour. Wind rose diagram, Air Quality Index (AQI), Standards for air pollution (as per Indian Standards and CPHEEO),

UNIT-II (08 Hrs.)

Air sampling and measurement: Ambient air sampling and stack sampling, collection of particulate and gaseous pollutants, (adsorption, absorption, incineration, condensation), site selection criteria, methods of estimation. Stack height determination

Air pollution controls methods and equipments: Principles of control methods for particulates and gaseous pollutants, gravity settlers, electrostatic precipitators, bag filters, cyclones and wet scrubbers

UNIT-III (07 Hrs)

Introduction to solid waste management(SWM): Structure , necessity and responsibility, Sources, Quantity and quality, Sources of solid waste, classification and components, physical and chemical characteristics, per capita contribution, sampling and analysis

Collection and transportation of solid waste: Method of collection, equipment used for collection and transportation, transfer stations, optimization of transport route.

UNIT-IV (07 Hrs)

Solid waste processing: Methods of processing, merits and demerits of various methods, 3R concept

Disposal methods: Composting of waste, methods of composting, factors affecting composting
Sanitary land filling: Site requirements, methods, leachate management

UNIT –V (07 Hrs)

Incineration: Principles of incineration, types of incinerators, advantages and disadvantages, Pyrolysis, Gasification, Refuse derived fuel(RDF), Biogas

Control of gases: Carbon Footprint, Emerging technologies and strategies to mitigate air pollution, Current challenges and way forward

40. Hydropower Engineering

RASHTRASANT TUKADOJI MAHARAJ NAGPUR UNIVERSITY, NAGPUR

FACULTY OF SCIENCE & TECHNOLOGY

B. TECH CIVIL ENGINEERING (CHOICE BASED CREDIT SYSTEM)

Sem: VII	Total Hours Distribution per week		
Total Credit: 03	Lecture (L): 3 Hrs.	Tutorial/Activity (T/A): 0 Hrs.	Practical (P): 0 Hrs.
Subject Code	BTCVE703T	Name of Subject: Hydropower Engineering (Elective-V)	
Examination Scheme			
Internal Marks:	University Marks:	Minimum Passing Marks:	Examination Duration:
30 Marks (15marks for sessional Examination) (15 Marks for Activity based)	70 Marks	45 Marks	3 Hours

Course Objective	
1	To impart the knowledge for understanding of various aspects of hydropower development
2	Demonstrate the ability to apply knowledge of mathematics, statistics, fluid mechanics, in design of penstocks, surge tanks and intakes
3	Understand the design of hydro power plant
4	Understand various types of Civil Engineering structures used in hydropower development and design aspects
5	Knowledge about electrical aspects of power unit and understand the importance of these items.

Course Outcome	
After completion of syllabus student able to	
1	To understand about the sources of water power and estimation of its potential
2	To learn the concept, design, investigation of power canals and its components
3	To understand the concept, design, investigation about various parts of power units.
4	To understand the concept, investigation about various parts of a power house.
5	To impart the knowledge about electrical aspects of power unit and understand the importance of these items.

SYLLABUS

Unit No.1 Introduction			
Details of Topic	Allotment of Hours		Mapped with CO Number
	L	T/A	CO
sources of energy, importance of water power, Hydropower development, Estimation of water power potential	03		1
Types of hydro power plant : classification of hydel plants, Run of river plants, General Arrangements of Run of River Plants, Valley Dam plants, Diversion Canal Plants, High Head diversion plants, Storage and pondage, Tidal power plant - Recent experiences in wave power development.	03		1
Pumped storage power plants, Small and mini Hydropower systems - Power demand, general description of layout; topographic requirements of each above.	02		1
	08		

KDK College of Engineering, Nagpur

(Accredited by NAAC & NBA)

Approved by AICTE, Recognized by UGC under Section 2(f) of the UGC Act, 1956

Affiliated to Rashtrasant Tukadoji Maharaj Nagpur University

Unit No.2 Water Conveyance System &Penstock			
Details of Topic	Allotment of Hours		Mapped with CO Number
	L	T/A	CO
Power Canals, Alignment, Design criteria for Power canals, Flumes, Covered conduits and Tunnels	03		2
Penstocks: general classification; design criterion; economical diameter; Anchor blocks, Conduit valves, Bends and manifolds.	05		2
	08		
Unit No.3 Water Hammer & Surge Tank			
Details of Topic	Allotment of Hours		Mapped with CO Number
	L	T/A	CO
Water hammer: Introduction, Transients caused by turbine, Load acceptance and rejection, equation for uniform diameter penstock, use of Allievi's chart.	03		3
Surge tanks: types; functions; locations; hydraulic design & stability of surge tanks, Channel Surges	05		3
	08		
Unit No.4 Intake			
Details of Topic	Allotment of Hours		Mapped with CO Number
	L	T/A	CO
Intakes: Types, locations, losses, trash & other components, control gates, emergency gates, canal forebay, general principles of alignment and balancing tank.	03		4
Turbines : types, general description and layouts, specific speed, Basic flow equations, characteristics of turbines	03		4
	06		

KDK College of Engineering, Nagpur

(Accredited by NAAC & NBA)

Approved by AICTE, Recognized by UGC under Section 2(f) of the UGC Act, 1956

Unit No.5 Power House			
Details of Topic	Allotment of Hours		Mapped with CO Number
	L	T/A	CO
Power houses: types, general layouts and approximate dimensions.	03		5
Electrical Load on Hydro Turbines : Load Curve, load Factor, Capacity Factor, utilization factor, Diversity Factor, load Duration Curve	04		5
	07

41. Water & Wastewater Treatment

RASHTRASANT TUKADOJI MAHARAJ NAGPUR UNIVERSITY, NAGPUR
FACULTY OF SCIENCE & TECHNOLOGY
B. TECH CIVIL ENGINEERING (CHOICE BASED CREDIT SYSTEM)

Sem: VII	Total Hours Distribution per week		
Total Credit:03	Lecture (L): 3 Hrs	Tutorial/Activity (T/A): 0 Hrs	Practical (P): 0 Hrs
Subject Code	BTCVE704T	Name of Subject: Water & Wastewater Treatment (Elective-VI)	
Examination Scheme			
Internal Marks:	University Marks:	Minimum Passing Marks:	Examination Duration:
30 Marks (15 Marks for sessional examination) (15 Marks for Activity based)	70 Marks	45 Marks	3 Hours

Course Objective	
1	The course will provide students' knowledge regarding the different sources of water & waste water, characteristics, available treatment technologies and designs
2	The course will make students able to design and implement the different water and wastewater treatment units
3	The course will provide students the knowledge regarding real problems finding and handling strategies of water and wastewater treatments.
4	The course will prepare students to learn recent and advanced treatments of water and wastewater and disposals methods.

Course Outcome	
After completion of syllabus student able to	
1	Understand the process and design components of water treatment such as Aeration, coagulation-flocculation and Sedimentation
2	Understand the process and design the components of water treatment such as Filtration, Disinfection
3	Understand the various sources characteristics and disposal methods of wastewater
4	Understand and design the different preliminary and primary waste-water treatment
5	Understand and design the different Secondary waste-water treatment

KDK College of Engineering, Nagpur

SYLLABUS

Unit No.1 Introduction to WTP & Aeration, Coagulation- flocculation & Sedimentation			
Details of Topic	Allotment of Hours		Mapped with CO Number
	L	T/A	CO
Introduction to Water Treatment: Objective of water treatment, unit operation and unit processes, treatment flow sheet, site selection for water treatment plant	01		1
Aeration: objective of aeration, types or aerators,	01		
Design of cascade aerator, gas transfer, two film theory	01		
Coagulation- Flocculation: Theory of coagulation objectives, types & factors affecting coagulation and flocculation, nature and types of chemical coagulants used in water treatment, coagulant and flocculent aids	01		
Design of rapid and slow mixing devices (hydraulic and mechanical),	01		
Sedimentation: Theory of sedimentation, factors affecting, types of settling, analysis of discrete and flocculent settling,	01		
Design of sedimentation tank and clariflocculators	01		
	07		
Unit No.2 Filtration, Disinfection & Minor methods			
Details of Topic	Allotment of Hours		Mapped with CO Number
	L	T/A	CO
Filtration: mechanism of filtration, types of filters	01		2
Design of rapid sand filters, filter media specifications,	01		
Preparation of filter sand from stock sand, problems in filtration.	01		
Disinfection: Method of disinfection, kinetics of disinfection, types of disinfectants,	01		

KDK College of Engineering, Nagpur

(Accredited by NAAC & NBA)

Approved by AICTE, Recognized by UGC under Section 2(f) of the UGC Act, 1956

chlorination, method of chlorination (breakpoint chlorination), factors affecting efficiency of chlorination	01		2
Iron and manganese removal, de-fluorination	01		
Recent development in water treatment	01		
	07		
Unit No.3 Characteristics & Disposal of Waste water			
Details of Topic	Allotment of Hours		Mapped with CO Number
	L	T/A	CO
Introduction to waste water Sources, Physical and chemical characteristics of waste water	02		3
DO, BOD, COD, determination of BOD rate constant, Problems on DO and BOD	03		
Disposal of sewage by dilution and by land disposal, Streeter-Phelps's equation. Numerical	02		
	07		
Unit No.4 Preliminary & Primary Waste water Treatment			
Details of Topic	Allotment of Hours		Mapped with CO Number
	L	T/A	CO
Treatment Methods: Waste water treatment flow sheet, preliminary & primary	02		4
secondary methods of treatment,	02		
Design of screen, Grit chamber and primary settling tank.	03		
	07		
Unit No.5 Secondary Treatments			
Details of Topic	Allotment of Hours		Mapped with CO Number
	L	T/A	CO
Biological unit processes: principle of biological treatment processes, design parameters of activated sludge process, aerated lagoons and stabilization ponds.	03		5
Design of ASP, Sludge treatment, aerobic and anaerobic digestion, reactor types (such as UASB, AFFB, Hybrid reactor) & factors affecting anaerobic digestion and sludge drying beds (excluding design)	03		
	06

42. Irrigation Management

**RASHTRASANT TUKADOJI MAHARAJ NAGPUR UNIVERSITY, NAGPUR
FACULTY OF SCIENCE & TECHNOLOGY
B. TECH CIVIL ENGINEERING (CHOICE BASED CREDIT SYSTEM)**

Sem: VII	Total Hours Distribution per week		
Total Credit:	Lecture (L): 3 Hrs	Tutorial/Activity (T/A): 0 Hrs.	Practical (P): 0 Hrs.
Subject Code	BTCVE704T	Name of Subject: Irrigation Management (Elective-VI)	
Examination Scheme			
Internal Marks:	University Marks:	Minimum Passing Marks:	Examination Duration:
30 Marks (15marks for sessional Examination) (15 Marks for Activity based)	70 Marks	45 Marks	3 Hours

Course Objective	
1	To Learn basic principles of irrigation management
2	To impart the knowledge of various irrigation efficient and effective methods
3	To know the efficient irrigation and water management to maximise crop yield
4	To discuss the importance of participation of irrigation stake holders
5	To know various rules and regulations, various water laws

Course Outcome	
After completion of syllabus student able to	
1	Discussion of various principles of irrigation management
2	Study of various methods of canal section design and approaches of optimal canal design
3	Estimation of seepage losses through a canal system and criteria to minimise it
4	Involvement of various stake holders of irrigation system and efficient functioning for the better efficiency of the system
5	Knowing various policies and attempt made by state and central Government for the proper functioning of irrigation system

SYLLABUS

Unit No.1			
Importance of Irrigation	Allotment of Hours		Mapped with CO Number
	L	T/A	CO
Goal and importance of irrigation management, various methods of irrigation, water use efficiencies, water charges, measurement of depth of irrigation, cropping pattern, crop rotation, conjunctive use	08		1
	08		
Unit No.2			
Canal Irrigation	Allotment of Hours		Mapped with CO Number
	L	T/A	CO
Types of canal, optimal canal design, an efficient canal network, maintenance of canal system, balancing canal section, methods of canal design and concept of command Area development authority	08		2
	08		
Unit No.3			
Water Losses	Allotment of Hours		Mapped with CO Number
	L	T/A	CO
Canal losses, measurement of canal losses, minimising the canal losses, canal lining, economic s of canal lining, concept of night irrigation	08		3
Unit No.4			
Involvement of stake holders	Allotment of Hours		Mapped with CO Number
	L	T/A	CO
Former participation water uses societies, participatory irrigation	08		4

“Service to the Society through Quality Technical Education”

KDK College of Engineering, Nagpur

(Accredited by NAAC & NBA)

Approved by AICTE, Recognized by UGC under Section 2(f) of the UGC Act, 1956

Affiliated to Rashtrasant Tukadoji Maharaj Nagpur University

management, training to the water users, role of engineers in irrigation system			
	08		
Unit No.5			
Irrigation Policies	Allotment of Hours		Mapped with CO Number
	L	T/A	CO
Irrigation policies and institution, present state of irrigation policies; water dispute, inter-state river water dispute, concept of inter linking of rivers and discuss their feasibilities	08		5
	08
